Reviewer's Notes

The current report is showing a large variance in as-is conclusions with the most current duplicate completed. The large variance appears due to the subject being listed and having interior photos online showing the subject has been remodeled inside. The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
