Notes

Reviewer's The difference in the as-is conclusion from the prior report is due primarily to the prior report utilizing comps that were superior in condition to the subject, as they had been remodeled/upgraded, skewing the as-is conclusion towards the top end of the market. The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
