| Comments Regarding Pricing Strategy | | |
| <p>The subject is unique in GLA, so it was hard to find similar GLA active comparables in the subject's market area and I was forced to use slightly inferior GLA active comparables and could not bracket the GLA guidelines for active comps. The subject property is a 2 story Colonial, 4357 square feet, built-in 1999, containing 4 bedrooms and 3.5 bathrooms and has been adequately maintained and considered to be in average marketable condition. The price range was over 20% indifference due to the neighborhood area hard to find comparable that is similar to the subject in condition and criteria. It was necessary to exceed the lot size and GLA variance guideline of 20% in an effort to use the best available comparable from within the subject's market area. It was necessary to use a comparable listing and sold having superior condition due to limited market activity in the subject's area. Property is located near a Highway, comparable shares values defining qualities with the subject in regard to age, GLA, location and condition so the subject location characteristics don't affect its marketability. The difference in bed/bath count due to the neighborhood area hard to find comparable that is similar to the subject in condition and GLA. It was necessary to use a sold and active comparable with a pool due to limited market activity in the subject's area. Consequently, a negative adjustment of \$10000 was assessed to the comparables with the pool in an effort to compensate for the enhanced marketability considered to be inherent in such a feature. In delivering final valuation, the most weight has been placed on CS2 and CL3 as they are most similar to subject condition and structure.</p> | | |

Clear Capital Quality Assurance Comments Addendum

Reviewer's Though it is a little outside the 6 month range, the 6 month market decrease does bring the variance in line with the prior appraisal.

Notes The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
