Comments Regarding Pricing Strategy		
<p>The subject property is a single family home, which is in overall average condition on the exterior. When searching for comps, the distance searched was 1 Mile and the time searched was 6 Months time. Sold comps were searched for beyond 3 Months Time to locate properties similar in GLA and condition. Since the subject is in average condition, emphasis was placed on using comps which were also in average condition. The market area has many recently remodeled or significantly updated homes, which were excluded from use in this report, because they are not most representative of the subject. Market conditions and property values are improving within this area. Per tax records, the subject's last sale was via a Trustee's Sale. The subject's bedroom count is unique for this area, and could not be bracketed by the sold comps. However, it is bracketed by the listing comps. The comps differing in bedroom count were adjusted for this difference. Comps within the subject's market area support a price which is higher than the subject's last sale. The subject property does not appear to have any negative site influences. The subject does not appear to be occupied. In addition, there are notices on the windows. The information on the notices is unable to be viewed clearly from the street.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
