| <b>R. E. Taxes</b>                    | \$2,009                       | Subject is located in a subdivision on standard lot size with sidewalks and curbs. Subject design is common for the area with tile roofing in a two story home. The curb appeal is average with established landscaping. The square footage and room counts are common for the build as well as the lot size. Normal wear and tear updating should be expected though subject is assumed to be move in ready. A full interior inspection is needed for the most accurate value. Improved properties are still common so some level of updating may be needed to meet average market standards. Parameters for search used were: 6 months sale date, half mile radius, +- 200 sqft, +-5 age. 6 sold comps and 5 list comps were returned. Comps chosen are similar in marketability and amenity as well as location, unless otherwise noted due to a lack of available comps. This report is completed assuming subject was built using standard builder grade materials with no assumed updating. |  |

| <p>Comps that are closest in appeal and condition have been given the most weight in determining the final value conclusion with adjustments for inferior or superior qualities made and noted where possible. Subject is located in a populated area that can be marketed to most average home buyers. Subject list price should be competitive with the available list comps for maximum exposure with pricing emphasis placed on the pending list comps. 90 day marketing times are uncommon in this area so an increased list price above available list comps would be needed if 90+ day marketing time is the goal. Value is based on exterior only and the assumption the interior is in average condition. Any discrepancies in this assumption could affect the suggested value either way.</p> |                    |                       |
