#### Comments Regarding Pricing Strategy

It was necessary to extend search parameters in order to find the most comparable listings. There is an inventory shortage. All comparables are taken from similar neighborhoods. Subject property is noted to be in average condition from the exterior and is located in a residential area of similar homes with no adverse external influences noticed. I went back 12 months, out in distance 2 miles, and even with relaxing gla search criteria I was unable to find any comps which fit the requirements. Within 2 miles and back12months I found10comps of which I could only use3due to lot size factors. The ones used are the best possible currently available comps within2miles and the adjustments are sufficient for this area to account for the differences in the subject and comps. There is a current lack of iventory in this area so I went as far as possible to find the most similar condo comps although they vary in price are area they are the best available. The most weight was given to list comp 1 as it is within 1 mile and similar to subject community prices. All sold comps are within the community so they are all appropriate to value subject. Sold 1 and 2 were given most weight as they are equal in size and condition
