Neighborhood Comments

The subject neighborhood was noted to be comprised mostly of single family detached residences of varying styles while being similar to subject in most major characteristics, such as overall GLA, lot size, quality of construction etc. The subject style, utility, and general characteristics are in overall accordance with the subject neighborhood and the subject is fully conforming with the area. The average year built for the area is early 1950's through 1970's before tapering off. The average lot size is about 2,500 sq/ft and the average GLA is about 2,500 sq/ft. The area is experiencing ongoing gentrification with larger, new construction properties being built on existing lots and the subject neighborhood shows a mixture of original and newer construction properties. Many original construction properties have either been previously remodeled or periodically updated; therefore, good condition category is reserved for brand new construction or brand new remodels rather than periodically updated properties or older remodels. The subject appears to be original construction for the area and average overall.

Listing Comments Why the comparable listing is superior or inferior to the subject.

- Listing 1** Both condition and overall quality of construction seem average for the area and comparable to the subject, but the market is sale driven, sold comps are the focus in establishing value. Remains active with 1 reduction, remains within overall marketing times (covid-19 is influencing the overall economy, but the situation is still evolving, cannot fully assess any impact at this time; however, the market is showing resilience and is stable with robust demand. 90 days or less is deemed adequate to generate accepted offer for subject's area and price range, or price reduction probably needed).
- Listing 2** Condition seems average and comparable to the subject, overall quality of construction seems average and comparable to the subject. Under contract/pending sale without reductions and within overall area marketing times.
- Listing 3** Seems average in overall condition and quality of construction, seems comparable to the subject. Under contract/pending sale without reductions and within overall area marketing times.

Reasons for Adjustments Why the comparable sale is superior or inferior to the subject.

- Sold 1** Quality of construction seems average and comparable to the subject, as does the overall condition. Sold conventional financing without reductions, sold within overall area marketing times. Adjustments; -\$15,000 BR x 1.
- Sold 2** Both condition and overall quality of construction seem average for the area and comparable to the subject. Sold conventional financing without reductions, sold within overall area marketing times. Adjustments; -\$31,600 GLA.
- Sold 3** Overall quality of construction seems average for the area, condition seems average and comparable to the subject. Sold conventional financing without reductions, sold over listing price (not uncommon, driven by lack of inventory. It is difficult to know if over listing price sales will continue with the evolving covid-19 situation and the changing economy, but inventory remains limited and interest rates low, which favors the subject and the market does not seem to be weakening at this time, demand continues unabated).

Comments Regarding Pricing Strategy		
<p>Available inventory remains limited and interest rates very low; these factors are driving and sustaining demand. The market is sale driven, and the sold comps are used to establish the subject value; sold comps were considered up to 1 year back due to proximity concerns (the market has not been rapidly changing). The subject seems similar to all the sold comps in the report in combined characteristics, but probably most similar to CS3, which is exact same GLA, same street and seemingly similar in all other characteristics. Therefore, the subject's final projected value is aligned more closely with the sales price of CS3. Market conditions are being impacted by the evolving covid- 19 crisis and the future in terms of how the overall market will be impacted is difficult to assess at this time. Showings, open houses etc have been restricted and this is impacting the market. However, there has been some easing in restrictions and this factor combined with very low interest rates and overall confidence in the real estate market for the long term seems to be helping to maintain confidence and momentum in the market. Sales are being reported during the current situation and overall the market seems positive when all factors are considered; the market is deemed stable at this time and demand continues unabated. Note 1; quick sale is interpreted to mean all cash sale, it is not known what incentive would be required for a cash sale; for the subject's price bracket 5 % approx is suggested, but is an estimate only, financed offers might be generated within 30 days without any incentive, based on overall market activity.</p>
