Listing Comments Why the comparable listing is superior or inferior to the subject.

- Listing 1** Both condition and overall quality of construction seem average for the area and comparable to the subject, but the market is sale driven, sold comps are the focus in establishing value. Under contract/pending sale with 1 reduction and within overall area marketing times (covid-19 is impacting the market but is still evolving, cannot fully assess any impact at this time. 90 days or less is deemed adequate to generate accepted offer or price reduction probably needed).
- Listing 2** Seems average in overall condition and quality of construction, seems comparable to the subject. Remains active without reductions, remains within overall area marketing times.
- Listing 3** Condition seems average and comparable to the subject, overall quality of construction seems average and comparable to the subject. Remains active without reductions, marketing time becoming extended, price reduction probably needed to generate offers.

Reasons for Adjustments Why the comparable sale is superior or inferior to the subject.

- Sold 1** Adjustments; +\$3,500 GLA. Overall quality of construction seems average for the area, condition seems average and comparable to the subject. Sold conventional financing with one reduction, marketing time extended, but not due to demand which was healthy at time of sale and remains healthy; possibly due to higher initial listing price.
- Sold 2** Adjustments; +\$20,200 GLA. +\$15,000 BA x 1. Condition seems average with some minor periodic updates. Overall quality of construction seems average for the area and comparable to the subject. Sold cash without reductions, sold within overall area marketing times.
- Sold 3** Adjustments; -\$12,900 GLA. Both condition and overall quality of construction seem average for the area and comparable to the subject. Sold conventional financing without reductions, sold within overall area marketing times.

Comments Regarding Pricing Strategy		
<p>The market is sale driven, and the sold comps are used to establish the subject value; sold comps were considered up to 1 year back due to proximity concerns (the market has not been rapidly changing). The subject seems similar to all the sold comps in the report in combined characteristics, but it is not known exactly where on the spectrum of sold data the subject will actually sell. However, the sold comps utilized seem representative of the subject's achievable value, and it seems fair to suggest that the subject's final value would fall within the overall sales range of the sold comps utilized for the report. Therefore, the subject's final projected value is bracketed based on the overall adjusted sold data. Market conditions are being impacted by the evolving covid- 19 crisis and the future in terms of how the overall market will be impacted is difficult to assess at this time. Showings, open houses etc have been restricted and this is impacting the market. However, there has been some easing in restrictions and this factor combined with very low interest rates and overall confidence in the real estate market for the long term seems to be helping to maintain some confidence in the market, and sales are being reported during the current situation. Overall the situation seems positive when all factors are considered and the market seems stable at this time. Note 1; quick sale is interpreted to mean all cash sale, it is not known what incentive would be required for a cash sale; for the subject's price bracket 5 % approx is suggested, but is an estimate only, financed offers might be generated within 30 days without any incentive, based on overall market activity.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
