Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The current report is showing a large variance in as-is conclusions with the most current duplicate report. However, the prior report was completed with erroneous subject information(SFR), resulting in the large discrepancy. The subject information in the current report has been verified and is the most accurate representation of the property(TAX-manufactured). The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
