Comments Regarding Pricing Strategy		
<p>The subject property is a single family home, which is in overall good condition on the exterior. The subject's attached current MLS Listing indicates that the subject is in good condition and the interior has been updated/remodeled. Therefore, all comps used in this report are in good condition. The subject's roof appears to need a repair, as outlined in this report. The subject's location was confirmed via Parcel Map. The distance searched for similar comps was 1.25 Miles and the time searched was 12 Months time. Comps were searched for slightly beyond 1 Mile to locate properties similar in GLA and other attributes. It was necessary to search beyond 3 months time for sold comps as there were limited recent similar sales in this area. The GLA Tolerance searched for comps was +/- 20% of the subject's GLA. Market conditions and property values are improving within this area due to very strong demand and limited inventory of homes for sale. The subject is located within 500 Feet of Commercial/Industrial Property. It was not possible to locate a similar comp with the same influence. However, all of the sold comps were adjusted for this difference. The value variance between comps is larger than typical, but was necessary due to limited similar comps in this area. The subject's price has been bracketed within the range of comp values and both the sold and list comps were considered since the subject is located in a rapidly improving market area. Vacant: The subject was confirmed to be vacant, as the subject's MLS Listing indicates that it is vacant.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The current report is showing a large variance in as-is conclusions with the most current duplicate completed. The large variance appears due to condition, market increase and subject's current listing and sales history. The subject is currently pending contract for 249900. Per the MLS the subject has been renovated and in good condition. The market has increased over 42% within the last 12 months and over 25% within the last 6 months. The current report is more accurate and inline with the subject's pending price.
