Comments Regarding Pricing Strategy		
<p>The subject property is a single family home, which is in overall average condition on the exterior. The interior of the subject property was not inspected for this report, and is assumed to be in average condition. The subject's recent MLS Listing does not include any interior photos. The distance searched for similar comps was 1.5 Miles and the time searched was 12 Months time. Listing comps were searched for slightly beyond 1 Mile to locate properties similar in GLA and other attributes. It was necessary to search beyond 3 months time for sold comps as there were limited recent similar sales in this area. The GLA Tolerance searched for comps was +/- 20% of the subject's GLA. The subject is in average exterior condition and emphasis was placed on using comps which were also in average condition. However, this market area is saturated with comps which have updating and remodeling. In addition, there are limited comps which support the subject's GLA and other attributes. Therefore, it was necessary to use two superior condition comps within this report. This factor was considered and the superior condition comps received the least weight on the subject's final price. Market conditions and property values are improving within this area due to very strong demand and limited inventory of homes for sale. Subject's Pricing: Sale 1 is located on the same street as the subject and is very similar in GLA to the subject property. As such, this comp received the most weight on the subject's price opinion. Comps within the subject's market area support a price which is lower than the subject's recent list price.</p>
