<b>Comments Regarding Pricing Strategy</b>		
Public and/or private data was collected and analyzed, including but not limited to all available tax documentation and MLS data, to determine neighborhood characteristics, local market conditions, use, zoning, tax assessments, physical characteristics, transaction history and past or current listing information. Information was then gathered on six other properties that are comparable to the subject property in location, use and dominant features: three that have been recently sold and three that are currently listed for sale
