Comments Regarding Pricing Strategy		
<p>The final price point was determined by near even comparison between the active and sold listings. The price variance was quite narrow between most of the comparable listings. Due to the fact that the sold comparable listing's days on the market are below the typical marketing period for the area and less than 30 days on average, the final price will reflect a more aggressive value near the upper end of prices. The final valuation is for a fair market price estimated to encourage the requested marketing period for this area.</p>
