Comments Regarding Pricing Strategy		
<p>Based on exterior inspection the subject, not in need of repairs and considered to be in average condition. Subject attributes were taken from tax. The subject is located within reasonable proximity to major highways, School, Park and retail amenities. No negative external influence was noted as per aerial view. Proximity parameters were exceeded up to 3 mile as there were limited comparable within 1 miles having GLA +/- 30%, year built +/- 40, and 12 months back. To stay in closer proximity, need to exceed age, lot size and bed/bath count. In order to include comparable to reinforce the subject's GLA and other attributes, the sold comparable search was broadened to 12 months' time. Comparable having superior bed/bath count have been used since subject has unique bed/bath count when compared to neighbourhood. Since there were limited comparable having same subject attributes were available on the similar side (location) of the subject it was necessary to use comparable from across major roads and highway. It does not cause any negative or adverse effect on the market value. In delivering final valuation, most weight has been placed on CS2 and CL2 as they are most similar to subject condition and overall structure. Comparable(CS1, CS2) received multiple offers which resulted in an increased Sale price relative to final list price.</p>
