Comments Regarding Pricing Strategy

The subject property has trees and vehicles in front of the home. The best photos possible of the subject have been provided. The subject property has a Misc. Transfer on 07/30/2021 for \$320,000. The subject property is a single family home, which is in overall average condition on the exterior. The subject's location was confirmed via Parcel Map. The distance searched for similar comps was 1.5 Miles and the time searched was 12 Months time. Listing comps were searched for slightly beyond 1 Mile, but within similar and competing areas due to limited comps. It was necessary to search beyond 3 months time for sold comps as there were limited recent similar sales in this area. The GLA Tolerance searched for comps was +/- 20% of the subject's GLA. The subject is in average exterior condition and emphasis was placed on using comps which were also in average condition. However, this market area is saturated with comps which have updating and remodeling. In addition, there are limited comps which support the subject's GLA and other attributes. Therefore, it was necessary to use two superior condition comps within this report. This factor was considered and the superior condition comps received the least weight on the subject's final price. Market conditions and property values are improving within this area due to very strong demand and limited inventory of homes for sale. All of the sold comps are located within the same subdivision as the subject property. These comps support a price which is slightly lower than the subject's recent transfer price. The value variance between comps is larger than typical, but was necessary due to limited similar comps in this area. The subject's price has been bracketed within the range of comp values.
