Reviewer's Notes There is a positive variance of 25.7% to the prior report completed on 02/2022. The variance is due to comp selection and the current market. The prior report utilized comps smaller than and further away from the subject. The current report utilizes more proximate comps that bracket the overall characteristics. The current report utilizes comps that are within a reasonable distance, relatively current, fair market sales, and accurately reflect the subject's overall defining characteristics. Thus the as-is conclusion appears to be adequately supported. There has also been a PPSF market increase of 11.7% 6mo/6mo.
