Comments Regarding Pricing Strategy

The subject property is a Townhome, which is in overall average condition on the exterior. The subject's location was confirmed via Parcel Map. The distance searched for similar comps was 2 Miles and the time searched was 12 Months time. Comps were searched for beyond 1 Mile as there is a shortage of similar comps under 1 mile from the subject property. It was necessary to search beyond 3 months time for sold comps as there were limited recent similar sales in this area. The GLA Tolerance searched for comps was +/- 20% of the subject's GLA. The subject is in average exterior condition and emphasis was placed on using comps which were also in average condition. However, this market area is saturated with comps which have updating and remodeling. In addition, there are limited similar property type comps which support the subject's GLA and other attributes. Therefore, it was necessary to use four superior condition comps within this report. This factor was considered and the superior condition comps received the least weight on the subject's final price. Market conditions and property values are improving within this area due to very strong demand and limited inventory of homes for sale. The subject property is located within an Age Restricted Community. All of the comps except List 1 are located in Age Restricted Communities. It was not possible to locate a similar property type listing comps which was in average condition and within an Age Restricted Community. Therefore, it was necessary to use one listing that was not in an Age Restricted Community. The subject did not appear to have any major negative site influences. It was not possible to locate a sold comp with the same parking type as the subject property. The sold comps were adjusted for this difference. The subject's bedroom and bathroom counts have been estimated for this report as they are not available in Tax or Public Records. It was necessary to use comps on superior lot locations due to the lack of Townhome comps in this area, and the sold comps were adjusted for this difference. Subject's Pricing: The value variance between comps is larger than typical, but was necessary due to limited similar comps in this area. The subject's price has been bracketed within the range of comp values.
