Sales Comparison Analysis

DESCRIPTION OF COMPARABLE SEARCH CRITERIA

Up to twelve months market search was conducted within the subjects neighborhood, similar competing neighborhoods, and the general market area to find properties that reflect the subjects market criteria and features, i. e., location, gross living area (GLA), lot size, actual/effective age, and the subjects functional utility. To the best of the appraiser's knowledge, the comparables presented and utilized in this report, represent the most relevant data appropriate for analysis and valuation.

EXPLANATION OF ADJUSTMENTS

Based on the MLS indicated information of remodeling and updated or condition of these comparables, adjustments were made accordingly based on this information; MLS interior (available) photos. All the necessary adjustments that reflect the market's reaction for each contributable characteristic and appraiser's assessment of contributory value, via paired sales and/or market analysis. Adjustments represent the estimated typical buyer's reaction to a particular feature, not the actual cost. The appraiser has relied upon information from the MLS, the sales office, as well as county records, all reliable sources, but if found to be incorrect, incomplete or intentionally misleading, may affect market value.

ADDITIONAL COMMENTS (OPTIONAL)

Reconciliation Summary

All sales comparables used within this report were from within and from similar neighborhoods that exhibit similar quality of construction and amenities. The sales comparables were considered the best properties available at the time this report was being prepared, and they reflect and reinforce the subject's market value.

Scope of Work

REPORT FORMAT:

This report has been prepared under the following USPAP reporting option: Appraisal Report. The content of this Appraisal Report has been supplemented with additional information and data about the subject property and its market, as well as the data, reasoning, and analyses that were used in the valuation process. The cost approach and income approach have been omitted from this report as they are not necessary to produce credible assignment results. If the appraiser determines that credible assignment results cannot be provided without employing either the cost or income approaches to value, this assignment will be rejected by the appraiser or the scope expanded to the extent required to produce credible assignment results in compliance with USPAP. Unless otherwise stated, the appraiser has incorporated only the Sales Comparison Approach.

PURPOSE OF THE ASSIGNMENT:

The purpose of this Appraisal Report is to determine an and the opinion of the market value for the subject property, at which it could sell in a typical exposure time for the area, considering current market conditions, the condition of the subject and necessary repairs.

SCOPE OF WORK:

This Appraisal Report was performed by a Licensed or Certified Real Estate Appraiser to estimate the market value of the subject property being evaluated as of the effective date of value stated. Clear Capital has provided the appraiser with additional preliminary data resources for consideration in the analysis, which may include: Property Inspection, MLS records, and Public Records. Although the appraiser did not physically inspect the subject property, at a minimum the appraiser has considered the results of a recent visual property inspection completed by Jesse Brown, a licensed real estate agent having completed the above referenced Property Inspection.

AT A MINIMUM, THE APPRAISER HAS:

1. considered the additional data resources provided by Clear Capital as a resource for subject property and market data/characteristics;
2. consulted and considered supplemental market data from readily available data sources;
3. estimated the market value of the subject as of the effective date of this report restricting the desktop analysis to a sales comparison approach unless this was insufficient for credible assignment results.

THE APPRAISER HAS NOT:

1. Physically inspected the subject property or any of the comparables contained within the original report(s) or comparables presented in support of the appraiser's value opinion(s).

INTENDED USE:

The intended use of this Appraisal Report is for the lender/client to evaluate the property that is the subject of this appraisal for home equity line of credit, loan funding due diligence, loan sale, loan modification or loan securitization purposes.

INTENDED USER:

The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. buyer and seller are typically motivated;
2. both parties are well informed or well advised, and acting in what they consider their own best interest;
3. a reasonable time is allowed for exposure in the open market;
4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
