Comments Regarding Pricing Strategy		
<p>Comparison analysis was done by collecting market data, selecting the most appropriate comparable properties, verifying market data, applying appropriate adjustments, and reconciling the various adjusted indicators of value into a value estimate. Market prices are increasing. Low interest rates, low inventory, and increased demand are driving prices upward. Average marketing time is 60 days. All comps were the closest possible to subject in lot size, sq ft. and age, no better sale and active comps were found; therefore I include comps over 1 mile far from the subject property with inferior and superior features. I went back 11 months, out in distance 2- miles, GLA 20%-30% variance, age 30 years variance, lot size within 0.10- 0.50 acre. The comps used are the best possible currently available comps within 1-mile and the adjustments are sufficient for this area to account for the differences in the subject and comparables. The estimated adjustments for the comparables noted are as follows; GLA \$20 per square feet variance (if reached more than 100 sqft variance), age \$2000 every 10-year variance, full bath \$1000, and garage \$2000 per garage space.</p>
