Sales Comparison Analysis

DESCRIPTION OF COMPARABLE SEARCH CRITERIA

The focus for the comparable search was to find the most recent sales that were as similar as possible in GLA, lot size, location, quality, and condition. All of the comps are located in close proximity to the subject, less than one mile.

EXPLANATION OF ADJUSTMENTS

Market adjustments were applied for time, estimated at approximately 0.75% per month, for the increasing price trend estimated from the internal HDI analysis herein. Additional adjustments have been applied for quality, condition, GLA, AC, and parking utility. Where applicable, additional market adjustments have been made for site amenities. All of these adjustments have been based on various data sources and the experience of this appraiser. No market adjustments have been applied for differences in bedroom or bathroom, room count as these factors have been included in the GLA market adjustments where applicable. Market adjustments applied for condition have been based on a review of the photos and comments provided in the MLS listings. These adjustments are intended to reflect the market response for these differences. Market adjustments applied for quality have also been based on a review of the photos and comments provided in the MLS listings. Quality differences can include such things a building angles, trim finishes, quality of materials, etc. These adjustments are intended to reflect the market response for these differences.

ADDITIONAL COMMENTS (OPTIONAL)

It is understood that market adjustment percentages of should be no more than 25% gross, 15% net percentage, and individual line item adjustments of no more than 10%, are indicators requested by the typical lender guidelines. All of the comparable properties fall within these guidelines.

Reconciliation Summary

All of the comps have been taken from the surrounding market area, less than one mile from the subject location. The comps bracket the SP in lot size, but not in GLA. A search for a comps smaller than the subject was performed. However, no recent sales that were similar could be found. Comps is the most similar in square footage. Comp 1 is also the most recent sale found. The adjusted value range is relatively tight. Therefore, a value conclusion approximately mid-range of all four comps is judged reasonable and market supported.

DEFINITION OF MARKET VALUE

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. buyer and seller are typically motivated;
2. both parties are well informed or well advised, and acting in what they consider their own best interest;
3. a reasonable time is allowed for exposure in the open market;
4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
