| Comments Regarding Pricing Strategy | | |
| <p>Final value brackets smoothly between mid and high sold comps. General area and neighborhood typically is superior to surrounding area(s) in that most properties have been upgraded with hardwood flooring, softer interior paint, premium kitchen features as opposed to standard builder features to name a few. I have yet been able to find from a public records or an MLS search a listing describing a property as average condition or average features. To summarize, the condition of the interior of the improvements being valued is the same as the exterior condition of the property unless specified in the report. This being said, upgrades with neighboring properties in average condition are presumed similar to the subject property and viceversa. The preparer assumes that the condition of the interior of the improvements being valued is the same as the exterior condition of the property unless otherwise noted in the report. CONT. This being said, upgrades with neighboring properties in average condition are presumed similar to the subject property and vice versa. This report was performed following public awareness that COVID-19 was affecting residents in the United States. At the time of the report, COVID-19 was having widespread health and economic impacts. The effects of COVID-19 on the real estate market in the area of the subject property were not yet measurable based on reliable data. The analyses and value opinion in this report are based on the data available at the time of the assignment and apply only as of the effective date indicated. No analyses or opinions contained in this report should be construed as predictions of future market conditions or value. Covid 19 is having a direct impact on subject's market area in values and days on markets. For this reason, most current comps are used in report as opposed to those which are not.</p> | | |
