DESCRIPTION OF COMPARABLE SEARCH CRITERIA

Value Conclusion + Reconciliation

Up to twelve months market search was conducted within the subjects neighborhood, similar competing neighborhoods, and the general market area to find properties that reflect the subjects market criteria and features, i. e., location, gross living area (GLA), lot size, actual/effective age, and the subjects functional utility. To the best of the appraiser's knowledge, the comparables presented and utilized in this report, represent the most relevant data appropriate for analysis and valuation.

EXPLANATION OF ADJUSTMENTS

Based on the MLS indicated information of remodeling and updated or condition of these comparables, adjustments were made accordingly based on this information; MLS interior (available) photos. All the necessary adjustments that reflect the market's reaction for each contributable characteristic and appraiser's assessment of contributory value, via paired sales and/or market analysis. Adjustments represent the estimated typical buyer's reaction to a particular feature, not the actual cost. The appraiser has relied upon information from the MLS, the sales office, as well as county records, all reliable sources, but if found to be incorrect, incomplete or intentionally misleading, may affect market value.

ADDITIONAL COMMENTS (OPTIONAL)

All sales comparables used within this report were from the within and from the similar neighborhoods that exhibit the similar quality of construction and amenities. The sales comparables were considered the best properties available at the time this report was being prepared, and they reflect and reinforce the subject's market value.

Reconciliation Summary

Most weights were given to closed comp 1 was the most recent closed comp within the subject's neighborhood, as it best reflects the current values and trends in the subject's general market area. Comp 3 is also the subject's matched pairs, bearing the most comparable to the subject in the GLA; the number of bedrooms and bathrooms. The value concluded is the most probable price that this property should bring in a competitive and open market under all conditions and requisite to fair sales, with the buyer and seller each acting prudently and knowledgeable

DEFINITION OF MARKET VALUE

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. buyer and seller are typically motivated;
- 2. both parties are well informed or well advised, and acting in what they consider their own best interest;
- 3. a reasonable time is allowed for exposure in the open market;
- 4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
