## Clear Capital Quality Assurance Comments Addendum

<b>Reviewer's Notes</b>	The current report is showing a large variance in as-is conclusions with the most current duplicate completed. The large variance is because most proximate comps supporting a higher conclusion; The prior report rated the subject as Fair with needed repairs, whereas the current report rates the subject as Poor with repairs needed. The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
