Sales Comparison Analysis

DESCRIPTION OF COMPARABLE SEARCH CRITERIA

URAR: Sales Comparison - Summary - Comparable Search and Results (exceeds guideline): The search for sales data included a search within the "neighborhood boundaries" (as described on page 1) for comparable single family homes that were similar in condition, design, site size, and room count. The search was limited to homes that were built from 1955 to 2020 (year built), and a variance of 15% of the subject's gross living area. This initial comparable sale search focused on sales, listings, and pending sales with transaction dates within the past 12 months, located within 1 mile of the subject. Based on the lack of available relevant closed sales within the subject's market area within the past six months, it was necessary to utilize comparable sales older than six months old. All sales are located within the subject's demand area and are within tracts of similar design/appeal. No market barriers were noted.

EXPLANATION OF ADJUSTMENTS

Per market data, adjustments were made for differences in bathroom count (\$5,000 per 1/2 bathroom), gross living area (\$10 per sq.ft. for differences exceeding 100 sq.ft.), central air conditioning (\$5,000), car storage (\$10,000 per garage space) and pool/spa (\$15,000). No site size adjustments were warranted due to the similar overall usability of each site. No age adjustments were warranted due to the similar effective age of each comparable. The subject market consists of homes that typically have similar porches, patios, fire pits, bbq's, and fences, with little to no variation noted in contributory value between comparable sales in the area (unless otherwise specified). Any substantial or notable differences would be indicated on the appropriate line in the attached Sales Approach. All comparables were considered to be equal in this regard with no specific adjustments warranted. Note: The above noted adjustments (including "view amenity" adjustment) were made based on comparative analysis and data obtained through MLS of the utilized sales comparables. For each utilized comparable, either the listing agent was interviewed, or MLS (both the descriptive narrative and the accompanying photos) were utilized to make determinations on the level of upgrades and condition for each comparable. The implemented adjustments represent the extraction from market reaction to the noted differences, as represented in the value/price adjustments implemented in the appropriate line adjustment in the attached Sales Approach. The view adjustment was determined to be \$90,000 based on extensive research into the subject's market. During that research of paired sales analysis, the appraiser has determined that the variance in price for this factor has been \$90,000 consistently and therefore the comparable that enjoys a ocean view amenity (comparable #1) was adjusted accordingly.

ADDITIONAL COMMENTS (OPTIONAL)

Note: The view, quality of construction and overall condition of each comparable property were determined by agent interviews and Multiple Listing Service photos. (Redfin and any other 3rd party website photos are merged from the MLS photos and are the same). The appraisal process does not involve itemizing and adjusting for every difference noted in each property individually. Each property is given a rating based on the quality of construction and overall condition of the overall property. Some rooms/items may be superior to the subject property and some may be inferior. However, the overall quality and condition may be considered equal.

Reconciliation Summary

After reviewing and analyzing all three approaches, The Market, Cost, and Income Approaches, the Market Approach was determined to be the strongest supporter of value. The Cost Approach was considered supportive.

Scope of Work

REPORT FORMAT:

This report has been prepared under the following USPAP reporting option: Appraisal Report. The content of this Appraisal Report has been supplemented with additional information and data about the subject property and its market, as well as the data, reasoning, and analyses that were used in the valuation process. The cost approach and income approach have been omitted from this report as they are not necessary to produce credible assignment results. If the appraiser determines that credible assignment results cannot be provided without employing either the cost or income approaches to value, this assignment will be rejected by the appraiser or the scope expanded to the extent required to produce credible assignment results in compliance with USPAP. Unless otherwise stated, the appraiser has incorporated only the Sales Comparison Approach.

PURPOSE OF THE ASSIGNMENT:

The purpose of this Appraisal Report is to determine an and the opinion of the market value for the subject property, at which it could sell in a typical exposure time for the area, considering current market conditions, the condition of the subject and necessary repairs.

SCOPE OF WORK:

This Appraisal Report was performed by a Licensed or Certified Real Estate Appraiser to estimate the market value of the subject property being evaluated as of the effective date of value stated. Clear Capital has provided the appraiser with additional preliminary data resources for consideration in the analysis, which may include: Property Inspection, MLS records, and Public Records. Although the appraiser did not physically inspect the subject property, at a minimum the appraiser has considered the results of a recent visual property inspection completed by Costin Ene, a licensed real estate agent having completed the above referenced Property Inspection.

AT A MINIMUM, THE APPRAISER HAS:

1. considered the additional data resources provided by Clear Capital as a resource for subject property and market data/characteristics;
2. consulted and considered supplemental market data from readily available data sources;
3. estimated the market value of the subject as of the effective date of this report restricting the desktop analysis to a sales comparison approach unless this was insufficient for credible assignment results.

THE APPRAISER HAS NOT:

1. Physically inspected the subject property or any of the comparables contained within the original report(s) or comparables presented in support of the appraiser's value opinion(s).

INTENDED USE:

The intended use of this Appraisal Report is for the lender/client to evaluate the property that is the subject of this appraisal for home equity line of credit, loan funding due diligence, loan sale, loan modification or loan securitization purposes.

INTENDED USER:

The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. buyer and seller are typically motivated;
2. both parties are well informed or well advised, and acting in what they consider their own best interest;
3. a reasonable time is allowed for exposure in the open market;
4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.
