#### **Comments Regarding Pricing Strategy**

Subject's Pricing: The value variance between comps is larger than typical, but was necessary due to limited similar comps in this area. The subject's price has been bracketed within the range of comp values. Comps within the subject's market area support a price which is slightly higher than the subject's recent sales price. The subject property is a single family home, which is in overall average condition on the exterior. The exterior of the subject property does not appear to be in need of major repairs. Comps were searched for within a distance of 1.25 Miles and back 12 months in time. Listing comps were searched for slightly beyond 1 mile to locate properties similar in GLA and other attributes. It was necessary to search beyond 3 months time for sold comps as there were limited recent similar sales in this area which are in average condition, like the subject property. The GLA Tolerance searched for similar comps was +/- 20% of the subject's Sq. Ft. The subject is in average exterior condition and priority was given to locating comps which are in average condition. However, there is a shortage of similar comps, especially properties in average condition, and therefore it was necessary to use two superior condition comps within this report. Market conditions and home prices are increasing within this area due to continued strong demand and limited inventory of homes for sale. The subject property did not appear to have any major negative site influences.
