Exterior-Only Inspection Residential Appraisal Report

Purpose of Appraisal

The purpose of the appraisal is to provide an opinion of market value of the subject property as defined in the report, on behalf of the appraisal company facilitating the assignment for the referenced lender/client as the intended user of the report. The only function of the appraisal is to assist the lender/client mentioned in this report in evaluating the subject property for lending purposes. The use of this appraisal by anyone other than the stated intended user, or for any other use than the stated intended use, is prohibited. The purpose of the appraisal is to provide an opinion of market value of the subject property, as defined in this report. The purpose of this appraisal report is to determine Market Value as defined in the attached Statement of Limiting Conditions and Appraiser's Certification form.

Intended use

The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, home equity line of credit, or internal asset evaluation by the lender/client related to their specific use(s) cited on page 1. This report is not intended for any other uses.

Intended User

The intended user of this appraisal report is the lender/client.

Scope of Report

This appraisal is based on the information gathered by the appraiser from tax records, other identified sources, inspection of the subject property and neighborhood, and selection of comparable sales, listings, and/or rentals within the subject's market area. The original source of the comparables is shown in the data source section of the market grid along with the source of confirmation if available. The original source is presented first. The sources and data believed to be unreliable was not included in the report nor used as a basis for the value conclusion. The extent of analysis applied to the assignment may be further imparted within the report, the appraiser's certification below and/or any other statement of limiting conditions and appraiser's certification such as may be utilized within the Freddie Mac or Fannie Mae form 2055 (Dated 03/05), when applicable. The scope of work is to determine market value for the subject property.

Definition of Market Value is the most probable price a willing buyer & seller, each acting prudently and knowledgeably, in a competitive and open market and assuming the price is not affected by any undue stimulus, and are willing to pay. The appraiser's job is analogous to a reporter in that an issue is researched and reported. A property's particulars are the subject of the research and certain methods are employed in analyzing the data. The information and results are then reported in a brief summarized format.

Exposure Time relates the probable time the subject would likely have been exposed to the market to sell at it's estimated Market Value. Marketing Time relates the probable time the subject will need to be exposed to the market in order to sell at the estimated Market Value. These estimates are based upon the comparables' performance as well as typical marketing time evidenced by interviews of market participants and an analysis of listing to closings as indicated in MLS for the area.

Fee Disclosure: The appraiser is an hourly employee of Clario Appraisal Network and received no appraisal fee for the assignment.

* SUBJECT 36-MONTH PRIOR TRANSFER HISTORY *

11609 Atkinson Ave

-Transferred on 04/28/2022 for \$630,000. It transferred from Davis Lee A to Redwood Holdings LLC and was a Grant Deed (Document #462547).

* COMPARABLE 12-MONTH PRIOR TRANSFER HISTORY *

(may include properties that were considered but not utilized as comparables)

11619 Tarron Ave

-Transferred on 11/02/2021 for \$588,000. It transferred from Clear Recon Corp to Redwood Holdings LLC and was a Trustee's Deed (Foreclosure) (Document #1643291).

2121 Van Wick St

-Transferred on 03/25/2022 for \$0. It transferred from Gordon Calvin L to Gordon Faynetta and was a Affidavit (Document #339646).

11608 Cimarron Ave

-Transferred on 02/23/2022 for \$0. It transferred from Hagen Sandra J to Owner Record and was a Affidavit (Document #211055).

Clarification request sent on Thu, 5/5/22 5:55 AM PT.

The current appraised value represents a 20.6% increase in value since the prior sale/transfer. Please provide an analysis of the price variance between the prior sale of the subject and the current sale. The prior sale of the subject was reported, however to be in compliance with USPAP an appraiser must analyze any sale of the subject that has occurred in the past 36 months from the appraisal's effective date.

Revised 05/05/2022

The subject prior sale was a Notice Of Default, Auction, Bankruptcy Property with deferred maintenance as noted on the MLS#DW21251247. Therefore, it was sold for a much lower price.

The current value is based on exterior-only C3/The appraiser did not do a full interior inspection, therefore, an extraordinary assumption was used for the condition that all utilities were functional and in average condition at the time of this report. Unless otherwise known and noted in the report, the subject's current condition is assumed to be the condition as of the effective date of the appraisal. If found to be false, it may impact assignment results and could alter the value conclusion.

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Lender	Wedgewood Inc			

Supplemental Addendum

Borrower Name and Owner of tax Record - The borrower's name indicated in this report was obtained from the appraisal engagement letter. The owner of the subject property indicated in this report was obtained through Realist and Tax Records.

Highest and Best Use

The highest and best use of a site is that use, among the various legally permissible uses, which will provide the greatest financial return to the owner of the site. The subject site is zoned for single family residential uses, and is in a predominantly single family residential neighborhood. It is reasonably concluded that the present use is qualified as the highest and best use.

Neighborhood

The subject neighborhood consists of average to good quality construction tract homes, generally similar in age and architectural style. The general area is comprised of single family dwellings and multi-family residential bordered by small commercial businesses. All employment centers, schools, and shopping facilities are within typical, market expected proximity. 5% for other in the present land use represents vacant land, parks, schools and other miscellaneous lots. The surrounding homes are well maintained and the general appearance is average to good.

Comparable Sales

Comparables were selected that are most representative of current market activity in subject's general market area. All value affecting dissimilarities were adjusted according to market reaction, substitution or paired analysis. In order to avoid a duplication of adjustments any difference in room count is adjusted for in total gross living area. Site size adjustments were based on functional utility of sites as well as size. Overall condition adjustments were applied based on the appraiser's field observations and input from local agents, comments and photographs viewed through the MLS website. The comparable sales selected represents the most current and best available data at the time of the appraisal.

Sales Comparison Analysis - Summary of Sales Comparison Approach: This appraisal has been prepared in accordance with USPAP under Standards 1 & 2. All sales were selected from within the subject's immediate market area and were judged to be reasonably similar to the subject as regards most pertinent aspects. Comparables were selected based on physical and locational characteristics; they were not selected based on price. Thus, it's likely that the typical buyer would judge the comps selected to be interchangeable within the subject. Those sales selected were deemed the most reliable value indicators available as of the date of this analysis. The subject and all comparables are considered similar overall and best represent the current market. The comparables chosen represent the most recent relevant sales activity in the subject's immediate market location that are similar to the subject in size, age, design, quality of construction and overall market appeal. All factors were considered in the final determination of value, including but not limited to: location, GLA, condition, level of recent upgrading, lot size, location, view, site amenities and supply of similar properties in the current market inventory. The MLS utilized was the California Regional Multiple Listing Service (CRMLS).

Numerous sales have been researched in an attempt to provide the most comparable sales available within the subject's market area. Home sales have been analyzed in an attempt to pair / match sales in an effort to extract adjustments for factors such as site, GLA, view, condition, quality, etc. The adjustments made are based on the appraiser's best efforts to reflect the actions of buyers and sellers after extensive research of sales within the subject's market area. The dollar adjustments reflect market reaction to those items of significant variation between the subject and comparable properties. Every attempt has been made to utilize the most comparable sales available for meeting the lender guidelines, while at the same time reflecting the market activity within the subject's area.

Adjustments: The calculation of adjustments were derived from paired sale analysis, conversations with local brokers, office files, previous appraisals completed in the subject's neighborhood and the appraiser's working knowledge and experience. Gross Living Area (GLA) adjustments have been made based typical market response derived from recent and historic sales throughout the subject's general market area. Lot size adjustments are made based on the typical buyer's desire for larger yards/greater privacy. Condition/Quality adjustments, if made, are based on MLS list description/interior photos coupled with varying levels of upkeep/modernization as observed during the inspection. Note: UAD required condition/quality ratings include a range. A comparable may be within the same Condition/Quality rated range, yet variances of condition/quality within that rating require adjustment. It is possible for a comparable to have a condition/quality adjustment even though the UAD required rating is the same as the subject. See attached Uniform Appraisal Dataset (UAD) Definitions Addendum. View adjustments, if made, can have the same rating or description and still require an adjustment as not all views are equal. Adjustments for bedroom count differences were not assessed on the basis that such differences are typically reflected within the gross living area adjustments. Further, to make such adjustments would result in "double adjusting" which could in effect skew the value conclusion. Any difference in total room count is reflected in the GLA/Sq.Ft. adjustment. Age adjustments were not made based on the inconclusive data. Although there is a difference in the year built of the subject property and comparables, no age adjustments were made as the differences were considered with the overall condition of the property which was considered with the condition adjustments and ratings. Condition not age appears to have a more measurable influence on value.

The adjustmens are as follow below and rounded to the nearest hundred;

- GLA/Square Footage: \$100/sqft for (+/-100sqft in different)
- Site/Lot Size: \$10/sqft for (+/-1,000sqft in different)

- Bathroom Count: \$10,000 (Full bath)

Concessions - Adjustments for concessions were not applied dollar for dollar as the market does not react to such factors that lead to private party exchanges and they do not represent tangible differences between the comparable properties and the subject.

Condition of the Property

The subject property's condition is based on an extraordinary assumption and assumed to be in overall average to good condition. All the utilities were on and in proper working order at the time of inspection. Unless otherwise known and noted in the report, the subject's current condition is assumed to be the condition as of the effective date of the appraisal. If found to be false, it may impact assignment results and could alter the value conclusion. There were no significant physical, functional or external inadequacies noted, nor was there any apparent need for either major repairs to and/or remodeling of the improvements as of the date of inspection. Further, there have been no known recent additions to the subject floor plan. Subject's effective age is lower than the actual age due to overall preventative maintenance over time. Physical depreciation is due to normal wear and tear and age. All utilities (Gas, Electric and Water) were turned on and appear to be properly working at the time of inspection. Smoke and carbon monoxide detectors were present at the time of inspection. The water heater was double strapped. All major building components have been adequately maintained and are functionally adequate.

Adverse Conditions or External Factors

The size, shape and landscaping for this site is typical of sites in this neighborhood. This property is subject to normal utility easements, which have no negative effect on the value of the property. The appraiser did not check the land records for recorded easements and have reported only apparent easements, encroachments and other apparent adverse conditions. Lot dimensions are shown on the attached Plat/Assessor Map. It should be noted that the Plat/Assessor maps are produced for property assessment purposes and are not surveys of the property. The lot size was verified through tax records/Plat Map dimensions.

Additional Notes

Appraiser is not a license home inspector and was only able to visually inspect readily observable items. A license home inspector is recommended for a detail inspection of the subject property. The appraisal inspection is a value inspection and is no substitute for an engineering inspection. While the appraiser neither sees nor has been told of any obvious defect not otherwise reported, the appraiser is not an expert in identification of such items and the appraiser recommends the property have an inspection by a certified home or property inspector and a structural engineer. The appraiser assumes all structural, system, or HVAC systems are in good working order if no such report is provided. A home inspection by a licensed home inspector is recommended for any real estate purchase transaction.

Purpose of Appraisal

The purpose of the appraisal is to provide an opinion of market value of the subject property as defined in the report, on behalf of the appraisal company facilitating the assignment for the referenced lender/client as the intended user of the report. The only function of the appraisal is to assist the lender/client mentioned in this report in evaluating the subject property for lending purposes. The use of this appraisal by anyone other than the stated intended user, or for any other use than the stated intended use, is prohibited. The purpose of the appraisal is to provide an opinion of market value of the subject property, as defined in this report.

Intended Use

The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, home equity line of credit, or internal asset evaluation by the lender/client related to their specific use(s) cited on page 1. This report is not intended for any other uses. Additional Intended Use of this appraisal includes internal asset review and/or loan servicing (including default) by the client.

Intended User

The intended user of this appraisal report is the lender/client.

Scope of Work

This appraisal is based on the information gathered by the appraiser from public records, other identified sources, inspection of the subject property and neighborhood, and selection of comparable sales, listings, and/or rentals within the subject's market area. The original source of the comparables is shown in the data source section of the market grid along with the source of confirmation if available. The original source is presented first. The sources and data believed to be unreliable was not included in the report nor used as a basis for the value conclusion. The extent of analysis applied to the assignment may be further imparted within the report, the appraiser's certification in this report and/or any other statement of limiting conditions and appraiser's certification such as may be utilized within the Freddie Mac or Fannie Mae form 2055 (Dated 03/05), when applicable.

Competency

The appraiser has the appropriate knowledge and experience to complete this assignment competently. The comments made in this addendum are intended to expand on what the appraiser feels are areas of the most concern to the reader in order to fully understand the appraisal report and methodology. The expanded narrative allows the appraiser to provide additional comments where sufficient space is not available on the appraisal form. The market has been thoroughly searched and the sales reported represent the best available sales that properly weigh the four major elements of comparison, i.e. location, date of sale, physical characteristics and condition of sale.

Exposure Time

Defined as: "The estimated length of time that the property interest being appraised would have been offered on the

Supplemental Addendum

Borrower/Client	Redwood Holdings LLC						
Property Address	11609 Atkinson Ave						
City	Hawthorne	County Los Angeles	State	CA	Zip Code	90250	
Lender	Wedgewood Inc						

market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal." Exposure time is always presumed to precede the effective date of the appraisal. It is the estimated length of time the property would have been offered on the market, prior to the hypothetical sale, at the appraised value, on the effective date of the appraisal. It is a retrospective estimate based on an analysis of past events assuming a competitive and open market. This includes not only adequate, sufficient and reasonable time, but adequate, sufficient and reasonable effort. It is often expressed as a range and is based on the following: 1- Statistical information about days on market, most commonly obtained from the local MLS. 2- Information gathered through sales verification. 3- Interviews with market participants. Based upon historical market conditions, reasonable exposure time for the subject property would have been approximately **90 days**. This is based on the analysis of current market trends within the subject's sub-market, seasonal considerations and takes into account the size, condition and price range of the subject property and surrounding area. It presupposes the list price would be at or near the appraised value. It also assumes professional (proactive) marketing by reputable local real estate offices.

Marketing Time

Defined as: ""An opinion of the amount of time it might take to sell a real or personal property interest at the concluded market value level during the period immediately after the effective date of an appraisal." Marketing time can be based on one or more of the same elements used in determining the opinion of exposure time with the addition of one component: anticipated changes in market conditions. Anticipated changes in market conditions account for fluctuations in the cost and availability of funds, materials, labor, as well as other supply and demand characteristics. Marketing time and exposure time opinions often can be equal; particularly when no immediate changes in market conditions are anticipated. Marketing time is not intended to be a prediction of a date of sale and it may be inappropriate to assume that market value remains stable during the marketing period. In summary, appraisers are obligated to develop and report an opinion of exposure time; but not marketing time unless required by a supplemental standard or by agreement with a client. Exposure time exists before the effective date of the appraisal, whereas marketing time exists immediately after the effective date. While exposure time and marketing time are garnered through similar sources and many times yield like results, their distinct meanings and implications should carefully be considered by appraisers and users of their services.

So simply stated, Exposure Time is before the appraisal date while Marketing Time is after the appraisal date.

this
_1
Sale Date
(Effective Date of Appraisal)
1
Sale Date

(Effective Date of Appraisal)

Exposure Time can be measured by analyzing MLS marketing time (LMT, MT, or DOM) data. MLS statistics on marketing time is actually a measurement of Exposure Time, which is why these concepts can be confusing because Marketing Time in our appraisals (future projection) can not just be extracted from MLS data, which is historical. Marketing Time must be inferred from the data. One way to estimate Marketing Time is to start with historical data (exposure time) from the MLS and then apply the anticipated direction of the market with regards to supply and demand (i.e. inventory). Under stable market conditions, one would expect the Exposure Time to equal Marketing Time. But if supply and demand is shifting, Marketing Time could differ from Exposure Time. For example, if inventory is increasing, Marketing Time might be longer than Exposure Time. Conversely, if inventory is declining, Marketing Time might be less than Exposure Time.

(Hypothetical)

A hypothetical condition of a reasonable exposure time for the subject to be sold for the opinion of market value of the subject property in this market is approximately 90 days.

Site Comments

Due to incomplete and sometimes inaccurate flood data information available to the appraiser, it is recommended that the required lender flood certification is relied upon. It is assumed for the purpose of valuation, that the subject property is not in a flood zone, however, no warranties are implied. No adverse easements (normal tax utility easements exist), encroachments or other conditions were noted. No soil subsidence or other visible problems were evident, including adverse environmental conditions. However, it should be noted that the appraiser is not a qualified expert in these fields and can not render a professional opinion on this matter, no warranties implied.

Cash Equivalency

Unless otherwise stated in this report. All sales are considered cash equivalent. All comparable sales were financed through local mortgage lenders at market rates, and do not appear to have special conditions of sale.

Lender	Wedgewood Inc						

Definitions and Disclosures

Market Value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1- Buyer and seller are typically motivated;

2- Both parties are well informed or well advised, and acting in what they consider their best interests;

3- A reasonable time is allowed for exposure in the open market;

4- Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto;5- The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Source: Office of the Comptroller of the Currency under 12 CFR, Part 34, Subpart C-Appraisals, 34.42 Definitions (f)

Fee Simple Interest: Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

The market value "As-Is" for the subject property is an opinion of the market value of the property in the condition observed upon inspection and as it physically and legally exists without hypothetical conditions, assumptions or qualifications as of the date of this appraisal.

Unless otherwise stated in this report, the existence of hazardous material, which may or may not be present on the property, was not observed by the appraiser. The appraiser has no knowledge of the existence of such materials on or in the property. The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation, lead-based paint or other potentially hazardous materials may adversely affect the value of such property. The appraiser's final opinion of value in this report is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for any such conditions, or for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in this field, if desired.

The appraiser assumes no responsibility for economic or physical factors that may affect the opinions stated in this report which occur at some date after this appraisal report was completed. The appraiser reserves the right to make adjustments to this appraisal at a later date if other or more reliable data becomes available. No right to expert testimony, attendance in court, or taxation is indicated with possession of this appraisal report.

Sales Comparison

The market adjustments are based upon the market, and as such, may differ from actual cost. All of the comparables are considered to be competing properties within the same market and were selected to "range in" the subject value. The appraiser made an extensive search for the best available similar properties to the best represent the subject's most probable market value at the time of appraisal. The appraiser searched the local multiple listings and tax records for recent sales. Adjustments were made to the comparables in order to isolate the actual contributory value of each item.

Additional Comments

As required by Fannie Mae, Freddie Mac, HUD, VA and others, this appraisal report includes attachments, exhibits, maps and other addenda necessary (and often critical) for the client and or intended user to recognize the scope of work and development of the value opinion. This report may not be properly understood without reference to the information contained in the complete report. The attachments assist in the understanding the relevant characteristics of the subject property and may identify issues (if any) that should be addressed. They include data and analysis deemed necessary to provide the client with a credible value opinion. The "Clarification of Assumptions, Limiting Conditions, Certifications and Scope of Work" addendum clarifies and explains the scope of work employed in this appraisal and details what the appraiser did and did not do with regards to the assignment. It is recommended that the client, intended user or any reader review the appraisal report in its entirety so as to gain a full awareness of the subject property, it's market environment and the basis of the appraisal prior to using the value opinion in a business, investment or underwriting decision.

Use of MLS Photos - this appraisal report may include one or more digital images not personally captured by the appraiser. Fannie Mae and others allow the use of such images as long as they are sufficiently clear and descriptive of the property involved. On occasion, lighting conditions will be inadequate for the appraiser to capture a quality image of a comparable property when such comparable is inspected for use in an appraisal. Also, some comparables are in guarded & gated developments where no photos are allowed and MLS or other images may be used to augment the appraiser's drive by of the comparable and/or examination of aerial photos and tax office photos when available.

Predominant Value: The estimated market value lies above/below the neighborhood predominant value as is often typical within neighborhoods were a mixture of home sizes, design styles, and value ranges are present. The subject estimated value falls within the acceptable range of values for the neighborhood and the marketability is not affected because of its above/below position in relation to the predominant neighborhood value as estimated by the appraiser. This is evidenced by the relative number of sales both above and below the predominant neighborhood values as indicated on page two of this report.

EXTRAORDINARY ASSUMPTION: An "as is" opinion of Market Value has been rendered in the appraisal based on

Supplemental Addendum

Borrower/Client	Redwood Holdings LLC		
Property Address	11609 Atkinson Ave		
City	Hawthorne	County Los Angeles State CA Zip Code	90250
Lender	Wedgewood Inc		

the extraordinary assumption of the following: It is assumed that all structures, upgrades and/or remodeling, given value in this report are legally permitted. It is assumed that there are no unknown geological adverse issues. The subject's living area, bedroom and bathroom count stated in this report is based off what the appraiser measured and observed during the inspection and is assumed to be permitted and correct. The occupant type checked in this report is assumed to be correct. The physical characteristics of the comparables were either verified through county records, multiple listing service, drive-by inspections and or homeowner verification and is assumed to be as stated. The comparables are assumed to have no sales concessions. The current zoning is assumed to be as stated in this report. The legal age of the home is assumed to be as stated. The lot size of the subject was verified through public records/Plat Map dimensions and is assumed to be correct. If any significant discrepancies are revealed or if any of these items are found to be not true and correct, I reserve the right to change my appraisal. The appraisal assignment has been ordered by the lender/client. At the request of the client, this appraisal report has been prepared in compliance with the Uniform Appraisal Dataset (UAD) from Fannie Mae and Freddie Mac. The UAD requires the appraiser to use standardized responses that include specific formats, definitions, abbreviations, and acronyms. The appraiser attempted to obtain an adequate amount of information in the normal course of business regarding the subject and comparable properties. Some of the standardized responses required by the UAD, especially those in which the appraiser has NOT had the opportunity to verify personally or measure, could mistakenly imply greater precision and reliability in the data than is factually correct or typical in the normal course of business. Examples include condition and quality ratings as well as comparable sales and listing data. The appraiser makes no representations, guarantees or warranties, express or implied, regarding building materials, their fitness, quality, condition or remaining economic life. Not every element of the subject property was viewable. The appraiser did not move any personal property, due to liability concerns for potential damage to the property, to disclose or reveal any unapparent or hidden defects to the structure, nor did the appraiser dismantle or probe the structure to observe enclosed, encased, or otherwise concealed areas. Comparable data was generally obtained from third-party sources including but not limited to the local MLS, County Assessor, Township Assessor, online resources and additional public data sources. Consequently, this information should be considered and "estimate" unless otherwise noted by the appraiser. See attached Uniform Appraisal Dataset (UAD) Definitions Addendum.

HYPOTHETICAL CONDITION: a condition, directly related to a specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results, but is used for the purpose of analysis. Comment: Hypothetical conditions are contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in an analysis.(USPAP).

Reconciliation and Final Value Conclusion

In the final analysis, most consideration was given to the sales comparison approach as it best represents the actions of buyers and sellers in an open market.

In arriving at the final value, a primary consideration was given to comparables #1-3 because they are closed sales and similar in characteristics. The appraiser placed the most weight on comparables#1 and #3 due to their similarities in condition, size, utility, and with the least net/gross adjustments, closed within 3 months. At least two sales are fair market value/arm's length transactions. Additional consideration was given to the current market conditions. The sales were selected that are most representative of current market activity in the subject's general market area. The sales selected represent the most current and best available data at the time of the appraisal. The appraised value of the subject property is \$760,000 bracketed by the adjusted and unadjusted range of the sale price of the comparables.

The subject is a 1,192 sqft detached 3 bedrooms 2 baths located in Hawthorne, CA. The subject property is in average condition and of average quality for the area. It is currently in C3 condition. The subject also has a attached 2 car garage. All comps utilized in the report are similarly home located in the subject's immediate neighborhood and/or competing neighborhood. They are all suitable replacement properties that appeal to the same buyer pool. The primary differences between the subject and the comps used in the report are related to the specific characteristics of the subject as compared to the comparable properties.

These comparables were used due to the lack of more similar comparable sales in this area. Ideally, it is the appraiser's opinion to utilize sales that have the most recent settlement dates, however, due to a paucity of settled sales in the subject's market area, it was necessary for the appraiser to widen the market search to obtain comparables with similar utility, style, and effective age. The sales chosen are considered to be the best available from the market search. The sales reported are considered to best balance the four major elements of comparison. Other sales analyzed would have required less desirable adjustments that would reduce the reliability of the subject's indicated value.

The yearly special assessment taxes has no impact on the subject property's value and/or marketability. The taxes are typical for the subject property's neighborhood area. The subject property details are provided in the report.

Covid 19 has reduced overall sales volume and the number of listings and sales coming to market, it was necessary to use comps that vary from the subject's style but which are valuable and similar nonetheless in regards to overall size, condition, characteristics, and effective use. The comps were chosen based on the following criteria - GLA, proximity, bed/bath count, and condition. The sale period, age, and location were also considered while choosing comps for the report. All the comps chosen are within the range. The comparables chosen as they share the most similar characteristics to the subject with fewer adjustments needed. Price opinion is based on market data of recent sales. Most consideration was given to the Sales Comparatives. Comparison analysis was done by collecting market data, selecting the most appropriate comparable properties, verifying market data, applying appropriate adjustments, and reconciling the various adjusted indicators of value. There is no value or desirability difference in the subject's style vs the comparables. A variance style was unavoidable. No negative effect on the marketability of the subject.

Supplemental Addendum

Borrower/Client	Redwood Holdings LLC					
Property Address	11609 Atkinson Ave					
City	Hawthorne	County Los Angeles State	e CA	Zip Code	90250	
Lender	Wedgewood Inc					

No style adjustment warranted. The appraiser comparables searched a distance up to 1 mile, gla +/-25% sqft, lot size +/-30% sqft, age +/-10 yrs, and up to 12 months in time. The subject property is bracketed well by these comparable properties. The subject has an average appearance for the market. There is no effect on the value or marketability as there are dissimilar style comparable properties in the neighborhood. There are minimal features that separate it from the competition. The subject conforms with the neighborhood and is well maintained. Located in a demanded area and maintained neighborhood. Crossing major roads and other boundaries in this neighborhood do not affect the value. The market area consists of a diverse style of properties. Variation in year built, style, wide price range, and condition are common.

Appraisal Independence Certification

I do hereby certify, I have followed the appraiser independence safeguards in compliance with Appraisal Independence and any applicable state laws I may be required to comply with. This includes but is not limited to the following:

- I am currently licensed and/or certified by the state in which the property to be appraised is located My license is the appropriate license for the appraisal assignment(s) and is reflected on the appraisal report.
- I certify that there have been no sanctions against me for any reason that would impair my ability to perform appraisals pursuant to the required guidelines.

I assert that no employee, director, officer, or agent of the lender/client in this appraisal report, or any other third party acting as joint venture partner, independent contractor, appraisal management company, or partner on behalf of the lender/client, influenced, or attempted to influence the development, reporting, result, or review of my appraisal through coercion, extortion, collusion, compensation, inducement, intimidation, bribery, or in any other manner.

I further assert that the lender/client has never participated in any of the following prohibited behavior in our business relationship:

1) Withholding or threatening to withhold timely payment or partial payment for an appraisal report;

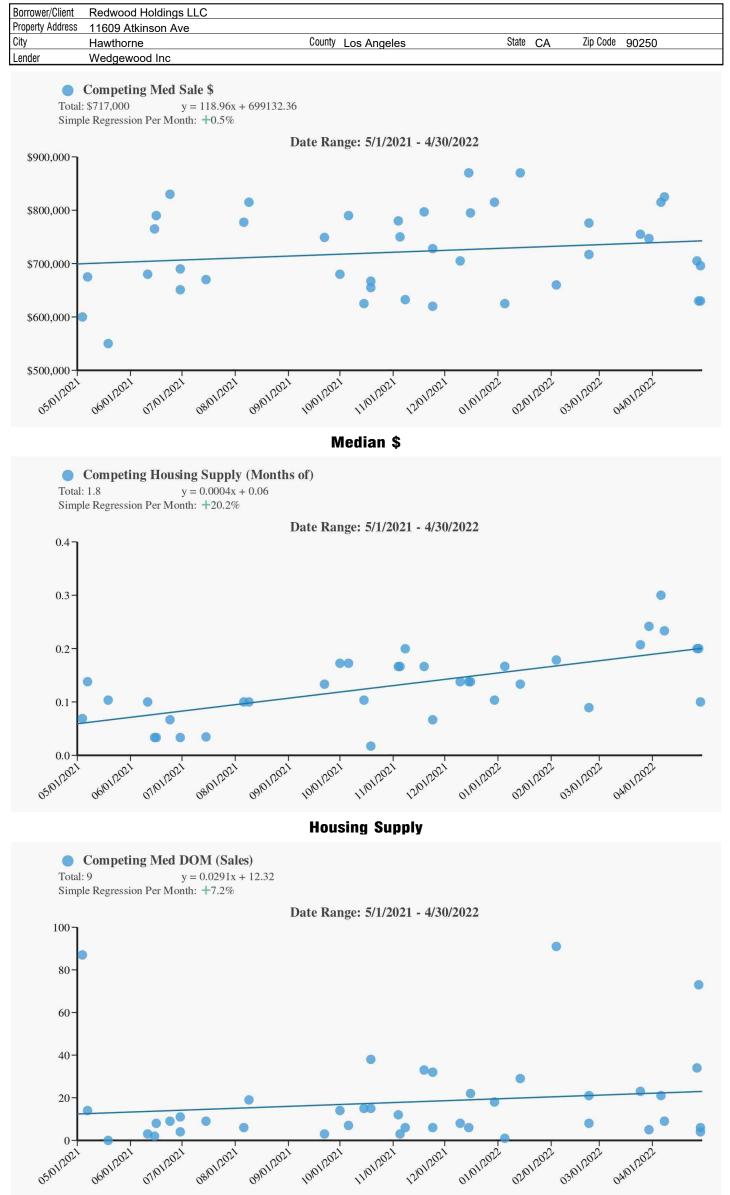

- 2) Withholding or threatening to withhold future business with me, or demoting or terminating or threatening to demote or terminate me;
- 3) Expressly or impliedly promising future business, promotions, or increased compensation for myself;
- 4) Conditioning the ordering of my appraisal report or the payment of my appraisal fee or salary or bonus on the opinion, conclusion, or valuation to be reached, or on a preliminary value estimate requested from me;
- Requesting that I provide an estimated, predetermined, or desired valuation in an appraisal report prior to the completion of the appraisal report, or requesting that I provide estimated values or comparable sales at any time prior to my completion of an appraisal report;
- 6) Provided me an anticipated, estimated, encouraged, or desired value for a subject property or a proposed or target amount to be loaned to the borrower, except that a copy of the sales contract for purchase transactions may be provided;
- 7) Provided to me, or my appraisal company, or any entity or person related to me as appraiser, appraisal company, stock or other financial or non-financial benefits;
- 8) Any other act or practice that impairs or attempts to impair my independence, objectivity, or impartiality or violates law or regulation, including, but not limited to, the Truth in Lending Act (TILA) and Regulation Z, or the USPAP.

Sell Score	553		
ESTIMATED VALUE			
RealAVM™	\$655,000	Confidence Score	67

RealAVM™ Range	\$582,950 - \$727,050	Forecast Standard Deviation	11
Value As Of	04/23/2022		

(1) RealAVM™ is a CoreLogic® derived value and should not be used in lieu of an appraisal.

(2) The Confidence Score is a measure of the extent to which sales data, property information, and comparable sales support the property valuation analysis process. The confidence score range is 50 - 100. Clear and consistent quality and quantity of data drive higher confidence scores while lower confidence scores indicate diversity in data, lower quality and quantity of data, and/or limited similarity of the subject property to compandue sales.

(3) The FSD denotes confidence in an AVM estimate and uses a consistent scale and meaning to generate a standardized confidence metric. The FSD is a statistic that measures the likely range or dispersion an AVM estimate will fail within, based on the consistency of the information available to the AVM at the time of estimation. The FSD can be used to create confidence that the true value has a statistical degree of certainty.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

СЗ

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.
