CLARIFICATION-REVISION REQUEST

The appraiser delivered this appraisal to the client on 8/30/2023. On 8/31/2023 following request was received.

The appraiser removed the signature, responded to the request, changed the signature date to 8/31/2023 and delivered a revised report to the client.

• The Ladder shown in Subject Side photo suggests the subject may have ongoing repairs. Please provide a cost to cure and comment on the impact on value, marketability, and health/safety.

No known ongoing repairs were observed at the time of the inspection or revealed to the appraiser by the current owners of the home.

If known repairs were needed or ongoing they would have been disclosed.

Per the current owner, the ladder in the picture was last utilized for cleaning purposes.

CLARIFICATION-REVISION REQUEST

The appraiser delivered this appraisal to the client on 08/30/2023. Later the same day 08/30/2023 following request was received.

The appraiser removed the signature, responded to the request, resigned the report and delivered a revised report to the client.

Subject

• Please ensure sufficient analysis and explanation is provided to support the opinion of value that is above the recent or current list price. Indicate if the current or previous broker/realtor was contacted regarding this list and what was revealed in that discussion.

Comparable Sales

• Please provide 1 more unique comparable sales that are also unique design styles Log. Expand search parameters back in time (up to 36 months), to similar competing market areas, or pending sales, as needed. If additional sales cannot be provided please comment on the extent of your search for comps and the effects of the subject's design on its overall marketability.

1. Additional commentary has been provided in support of the estimated increased value of the subject and its prior listing. See page #2 of URAR under the Analysis of prior sale section.

2. One additional comparable sale of log construction has been provided (Comparable #6). While this home is of log construction like the subject and Comparable #4, it is significantly inferior in GLA. As such is not the best indicator of value but does provide additional confirmation of marketability. This comparable has been given no weight in the estimate of value.

It should be noted Comparable #2 is a metal sided home that is also unique.

The subject unique log design style does not have a negative impact on its value or marketability.

Appraisal Purpose and Intended Use, User

The purpose of this appraisal report is to provide an estimate of market value of the subject property. The intended user of this report is the lender/client, who are Wedgewood Inc, and Clear Capital. No additional intended users are identified by the appraiser. This report contains sufficient information to enable the lender/client to understand the report. Any other party receiving a copy of the report for any reason is not an intended user; nor does receiving a copy of this report result in an appraiser-client relationship. Use of this report by any other party(ies) is not intended by the appraiser. The intended use is to evaluate the property that is the subject of this appraisal for a mortgage finance transaction, subject to the stated scope of work, purpose, reporting requirements, and definition of market value. At the request of the client, this appraisal report has been prepared in compliance with the Uniform Appraisal Dataset (UAD) form Fannie Mae and Freddie Mac. The UAD requires the appraiser to use standardized responses that include specific formats, definitions, abbreviations, and acronyms. The appraiser attempted to obtain an adequate amount of information in the normal course of business regarding the subject and comparable properties. Some of the standardized responses required by the UAD, especially those in which the appraiser has NOT had the opportunity to verify personally or measure, could mistakenly imply greater precision and reliability in the data than is factually correct or typical in the normal course of business. Examples include condition and quality ratings as well as comparable sales and listing data. The appraiser makes no representations guarantees, or warranties, express or implied, regarding building materials, their fitness, quality, condition or remaining economic life. Not every element of the subject property was viewable. The appraiser did not move any personal property, due to liability concerns for potential damage to the property, to disclose or reveal any unapparent or hidden defects to the structure, nor did the appraiser dismantle or probe the structure to observe enclosed, encased, or otherwise concealed areas. Comparable data was generally obtained from third-party sources including but not limited to the local MLS, County Assessor, online resources and additional public data sources. Consequently, this information should be considered an estimate unless otherwise noted by the appraiser. The UAD Definitions Addendum has been included within the report. I have performed no services, as an appraiser or in any other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.

FIRREA Certification Statement: The appraiser certifies and agrees that this appraisal was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.), and any applicable implementing regulations in effect at the time the appraiser signs the appraisal certification.

RE: APPRAISER'S LIVING AREA MEASUREMENTS ANSI Z765-2021 Standard:

The subject measurements were made in compliance with the ANSI standard of measurement and GLA is reported accordingly. Due to external impediments such as gutters, conduits, meters, housings, pipes, wires, fenestration, landscaping, extreme land grades, ice etc. The appraiser makes no guarantee that measurements are 100% accurate. Although comparable property GLA from public records is adjusted when discrepancies are clearly evident, the appraiser cannot attest to the measurement standards used in public records, nor to the accuracy of comparable measurements, nor to the accuracy of measurement reporting in public records.

COST APPROACH TO VALUE (not required by Fannie Mae)

Provide adequate information for the lender/client to replicate the below cost figures and calculations. Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value) The appraiser has reviewed 4 sales closed in the past 12 months of land sales similar in size all within the subject market area. The sales are contained within the appraisers work file.

Freddie Mac Form 70 March 2005

Fannie Mae Form 1004 March 2005

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a complete visual inspection of the interior and exterior areas of the subject property, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.

2. The appraiser has provided a sketch in this appraisal report to show the approximate dimensions of the improvements. The sketch is included only to assist the reader in visualizing the property and understanding the appraiser's determination of its size.

3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

5. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing the appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.

6. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.

2. I performed a complete visual inspection of the interior and exterior areas of the subject property. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.

3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.

5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.

6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.

7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.

8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.

9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.

10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.

11. I have knowledge and experience in appraising this type of property in this market area.

12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.

13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.

14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.

15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.

16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.

17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.

18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).

19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.

File # 47857

21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.

23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.

24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.

3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.

4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.

5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Freddie Mac Form 70 March 2005

Fannie Mae Form 1004 March 2005

| Supplemental Addendum |
|-----------------------|
|-----------------------|

| Borrower | Breckenridge Property Fund | | | |
|--------------|----------------------------------|----------------|----------|----------------|
| Property Add | ress 1796 Marble Valley Basin Rd | | | |
| City | Addy | County Stevens | State WA | Zip Code 99101 |
| Lender | Wedgewood Inc | | | |

NEIGHBORHOOD (Continued)

Residential sites of 1-20 acres in size with private septic systems, wells and access roads are common.

The 30% "Other" is an estimate of farm and resource lands.

Employment, shopping, schools, highway access, and recreational facilities are located within acceptable distances.

Single story homes similar to the subject in age are common within the within the neighborhood.

The subject estimated value is below the predominant value within the neighborhood. This is attributed to its modest GLA and smaller site size. The estimated value is well within the common range of values observed. As appraised it is of average marketability.

CONDITION and DESCRIPTION of IMPROVEMENTS (Continued)

RE: GLA of Subject

Public records indicate different GLA (1025/sf) than what the appraiser measured. The appraiser in confident the measurements are accurate. Differentials of this nature are not uncommon and are attributed to inaccuracies within the public record data.

RE: SUBJECT HOT WATER TANK STRAPPING

The subject hot water tank is not strapped. If this is a concern to the lender strapping of the tank should be required.

As disclosed the subject utilizes a private well and septic system. Public water and sewer is not available to the subject site. All of the comparables utilized also have private wells and septic systems like the subject. The subject use of a well and septic system has no effect on its value or marketability.

The subject is residential in nature and not utilized for agricultural purposes.

SALES COMPARISON ANALYSIS/COMPARABLE SALES SEARCH CRITERIA (Continued)

Radius; Within approximately 15 miles, all within the subject neighborhood as defined on page one of the URAR Time Frame: Past 6 Months GLA: ~900sf to ~1350sf Style: Rancher with no basement Year Built: ~1969 to ~1989 Other: Site size of 1-20 acres

The subject is located in a rural area with limited sales activity. The appraisers initial search using the above desired parameters turned up limited results. It was necessary to expand all of the parameters.

COMPARABLE SALES ADJUSTMENTS and RECONCILIATION

The purpose of the adjustment section of the appraisal report is to adjust the comparable sales to enable the appraiser to determine the ESTIMATED MARKET VALUE. The following remarks are made to serve as a brief description of the adjustments made and the reasoning for them. The dollar adjustments made were based on market data collected over an extended period of time, and also the appraiser's judgment and experiences supported by previous comparisons within the current market. Whenever possible, adjustments to the comparable sales are made by bracketing the subject with respect to the individual item (i.e., living area, site characteristics, view amenity, external influences, functional utility, effective age, quality, amenities, etc.). In this way, the adjustments can be extracted from the comparable sales shown. Where large individual adjustments are unavoidable due to the absence of comparable sales which closely match the subject, additional supporting data (land sales, matched pair sales analysis, additional comparable sales, etc.) will be included if available. If supporting data is not available, and it becomes necessary to make subjective judgments in adjusting for differences, the sales requiring such adjustments will be given less emphasis. Minor adjustments of up to 3% of the sales price (these are not usually explained as they fall within the margin of error) are made to reflect variations in amenities typical in the market which can not be measured by paired sales. These are made to aid in the correlation process and are based on the appraiser's subjective judgment. The appraiser has also made every attempt to bracket the subject with respect to value, so that some inferior and some superior properties are analyzed. In prioritizing the selection of comparable sales, date of sale and proximity to the subject are given highest emphasis, followed closely by physical characteristics of the improvements, site amenities and overall street appeal. Condition adjustments are derived from the variances between the subject and the comparable related to all curable items and to incurable short lived items.

| Supplemental | Addendum |
|--------------|----------|
|--------------|----------|

| Borrower | Breckenridge Property Fund | | |
|------------------|-----------------------------|----------------|-------------------------|
| Property Address | 1796 Marble Valley Basin Rd | | |
| City | Addy | County Stevens | State WA Zip Code 99101 |
| Lender | Wedgewood Inc | | |

Seller concessions of 1.5%-3% are typical within the subject market. No adjustment has been made for seller concessions unless the negotiated sale price was increased from the list price to include closing costs and multiple offers were not recieved.

The subject has beneficial views. Comparables #3 & #4 have superior views as their sites are elevated above valleys and were adjusted (-)5%. Comparable #5 is secluded in the woods and was adjusted (+)5%.

All of the comparables were in overall UAD C3 condition however adjustments were made for effective age at \$4000 per year based upon their overall age and level of recent updating.

Differences in site size was adjusted at \$3000 per acre.

GLA was adjusted at \$60/sf.

Per market data, no above grade bedroom count adjustment was made.

Bathrooms were adjusted at \$4000 per 1/2 bath and \$8000 per full bath.

Garages/Carports were adjusted at \$8000/\$3000 per bay.

Shops were adjusted at \$15/sf.

The appraiser has utilized cost adjustments calculated by extracting variable cost from published third party cost data, where applicable. Variable costs are those costs that vary directly with unit quantity, i.e. the adjustment value. Example: if 1,000sf of GLA costs \$120,000 and 1,100sf of GLA costs \$128,000, then the additional 100sf costs \$8,000. \$8000/100=\$80sf.

The comparable sales utilized were the most relevant, proximate and similar in age, design, and GLA to the subject available at the time of inspection.

A wide variety of differences in salient features exist between properties in small acreage neighborhoods including age, site size, views, outbuildings and other amenities. The result is gross/net and single line adjustments that commonly fall outside normal desired parameters. This was the case for this appraisal.

Comparable Summary

Comparables Summary & Estimated Indicated Value

| | Sale Price | Net Adj % | Grs Adj % | Ind Value | Weight |
|----------|------------|-----------|-----------|-----------|--------|
| Comp #1: | 319,000 | 3.5 | 15.6 | 330,180 | 26.8 |
| Comp #2: | 422,500 | 16.2 | 19.5 | 354,260 | 25.17 |
| Comp #3: | 460,000 | 18.5 | 21.9 | 375,040 | 24.16 |
| Comp #4: | 410,000 | 15.2 | 22.6 | 347,500 | 23.87 |
| Comp #5: | 385,000 | 10.8 | 31.9 | 343,570 | |

ESTIMATED INDICATED VALUE OF THE SUBJECT: 351,000

Indicated Weight Value

Estimated indicated value is determined by using the Gross Adjustment of sale price for each comparable as a measure of the relative quality of the comp. The Indicated Value is derived by multiplying the weight of each comp by the Adjusted Sale Price of that comp, repeating for each property, then adding them all together. This weighted average is used as the indicated value of the subject.

As with any method, this technique is not perfect. However, it does do a very good job of giving more weight to the most similar comps while at the same time minimizing values near the extremes of the indicated value range.

One additional active listing has been provided to lend support for the subject's estimated market value and current marketability.

As adjusted the comparable sales utilized are considered to be a good indicator of the subjects market value.

HIGHEST and BEST USE COMMENT

The definition of highest and best use is: The reasonably probable and legal use of vacant land or an improved property, which is physically possible, legally permissible, appropriately supported, financially feasible, and that results in the highest value to the land. The highest and best use of the site as though vacant is residential. This is a residence that would conform to surrounding improvements in size, quality, style and appeal. It would be legally permissible, physically possible, financially feasible and result in the highest value to the land. The subject is an existing residential home legally recognized and established. It is physically possible, financially feasible and has resulted in the maximizing the value to the land.

The highest and best use of the subject is the present existing use as single family residential.

MARKET CONDITIONS ADDENDUM to the APPRAISAL REPORT

The guidance for completing the Market Conditions Addendum to the Appraisal Report (Form 1004MC) comes from the FannieMae Frequently Asked Questions, Updated September 2014, as shown below.

Supplemental Addendum

| Borrower | Breckenridge Property Fund | | | | | | | |
|------------------|-----------------------------|--------|---------|-------|----|----------|-------|--|
| Property Address | 1796 Marble Valley Basin Rd | | | | | | | |
| City | Addy | County | Stevens | State | WA | Zip Code | 99101 | |
| Lender | Wedgewood Inc | | | | | | | |

Question 16. What type of properties are to be analyzed for the data reported in the One-Unit Housing Trends portion of the Neighborhood section of the appraisal report form?

The data regarding trends to be reported in the One-Unit Housing Trends section must be reflective of those properties deemed to be competitive to the property being appraised. Additional commentary should be provided on the other segment(s) of the neighborhood when segmentation is present to aid in understanding the overall neighborhood dynamics.

Question 17. Are the trends that are reported on the Market Conditions Addendum to the Appraisal Report (Form 1004MC) the same trends that are to be reported in the One-Unit Housing Trends section of the appraisal report (Form 1004)?

Yes. The conclusions regarding trends that are obtained from the Form 1004MC must be the same trends reported in the Neighborhood trends section of the Form 1004. The information reported on both forms must be consistent to provide the lender with a clear and accurate understanding of the market trends and conditions present in the subject neighborhood, based on properties that are considered competitive with the subject being appraised.

As I read Question 16, I interpret it to be referring to properties that would be "competitive" with the subject property and which should not be confused with comparable properties. Competitive properties would be all properties in a defined geographical market which offer similar utility, amenities and appeal to the defined market segment (e.g., single family residential buyers). Based on this interpretation of Question 16, Question 17 becomes self-evident. I refer to the first sentence at the top of the 1004MC form – "The purpose of this addendum is to provide the lender/client with a clear and accurate under-standing of the market trends and conditions prevalent in the subject neighborhood". Fannie Mae reinforces this concept of "market trends and conditions" throughout all of their documentation and instructions on the 1004MC.

Limiting the data to only comparable properties negates the concept of reporting "market trends and conditions" in the "subject neighborhood" as the appraiser would only be reporting on a sub-set of the defined market which may or may not present a true picture of what is happening in the defined neighborhood; more likely it would not present a true picture of the market.

SCOPE of the APPRAISAL ASSIGNMENT

It is assumed that any user of this report, including the borrower or home owner, has read the report and understands that no warranties are given as stated below. The "Scope" of this residential appraisal assignment is to research the characteristics and applicable data of the subject property, to visually inspect the subject property, to analyze the data, determine the "highest and best use" of the property, utilize the applicable 'approaches to value', and arrive at a final value conclusion of the subject's estimated market value as of the effective date of the assignment. The appraiser has viewed the subject property on the effective date of this report. A building sketch is provided based upon the appraiser's exterior measurements of the subject property, with the calculations generated by a computer program. While considered to be accurate, this final square footage is not guaranteed to be 100% accurate and may vary from the square footage provided by the county records and/or other sources. The appraiser has researched and analyzed market trends, local and regional influences, and has considered other significant factors known and/or made known to the appraiser, which are judged to be pertinent to the subject property. The appraiser researched comparable sales, pending sales and current listings from the multiple listing service, and also sales in the public records available from the county assessor's sales data. The comparable search includes the subject's neighborhood, as well as all competing areas typically considered by the same pool of prospective buyers, up to one year in an effort to provide the most credible results. An exterior observation of the most pertinent and relevant comparable sales has been conducted by the appraiser. Where reasonably possible, sales data has been confirmed from two sources. Conversations with parties involved with the transactions have been conducted in order to confirm the data and any atypical influences affecting the sales transactions. The appraiser has completed all applicable and necessary approaches to value and reported these results with a summary reporting option. The quality and quantity of the data utilized is limited to the sources available to the appraiser. The data sources typically used by the appraiser include Spokane County property characteristics from the assessor's data, the local, applicable Spokane MLS data, and in some cases, previous appraisal files. Any data relied on but not reported is located in the appraiser's work files. The property rights being appraised are "Fee Simple". No personal property is included in the subject's value conclusion.

EXPOSURE TIME

Exposure time is defined as the estimated length of time the property interest being appraised, would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal. This is a retrospective estimate based upon an analysis of past events assuming a competitive and open market. The exposure time for the subject and similar residential properties within the neighborhood of similar size, quality, age and condition has been determined to be approximately 30 - 90 days, if appropriately priced.

A reasonable exposure time for the subject property developed independently from the stated marketing time is 30-90 days.

DIGITAL PHOTOGRAPHS

The photographs used in this appraisal are digital photos utilizing imaging technology. The photographs used in this appraisal are a true and correct representation of the subject property and the comparable sales utilized in this report. Although the photographs may have been enhanced during the finishing process, no alterations were made to the images which would misrepresent the appearance of the subject property or comparables.

Analytics Addendum

This graph demonstrates the months of housing supply per month by taking the active number of listings during that month and dividing by the average number of sales per month over the 12 months trailing.

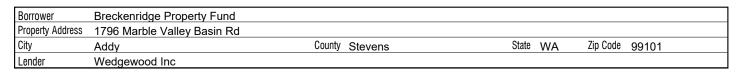

This chart shows the median days on market for sales and active listings during each month starting 08-29-2022 through 08-27-2023.

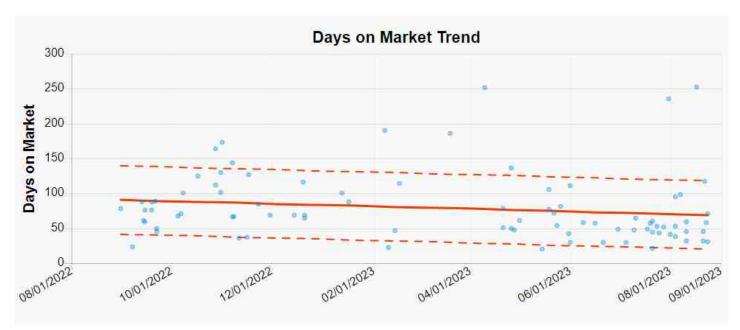

For each month from 08-29-2022 to 08-27-2023 this chart shows the median price for both sales and listings in the subject market.

Analytics Addendum

For each month starting 08-29-2022 through 08-27-2023 this chart shows the number of properties both listed and sold in the subject market.

This chart shows the median days on market for sales and active listings during each month starting 08-31-2022 through 08-24-2023.

For each month from 08-29-2022 to 08-27-2023 this chart shows the median price per square foot for both sales and listings in the subject market.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

СЗ

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.
