Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes There is a positive variance of 101.8% to the prior report completed on 02/2022. The variance is due to subject condition. The prior report shows the subject correctly in Average condition (per MLS). The current report shows the subject correctly in Good/Upgraded condition (per MLS, both MLS sheets for the subject attached to this report). The current report utilizes comps that are within a reasonable distance, relatively current, fair market sales, and accurately reflect the subject's overall defining characteristics. Thus the as-is conclusion appears to be adequately supported.
