Comments Regarding Pricing Strategy

Comps were selected that best support the subject's immediate market, location and subject features. Thresholds were set based on square footage, quality of construction, age, amenities and features, school district, and proximity. The most weight was given to the comps that were most similar to the subject when all features were considered. We feel our selected comps best represent the current value of the subject property out of available comps within the set thresholds. Due to a dearth in comps in the area it may be necessary to expand search parameters. I always attempt to locate comps within one mile but this may not always be possible. I am not always able to locate comps with exact room count that are similar enough in all ways. I have used the most appropriate comps available.
