# Exterior-Only Inspection Residential Appraisal Report File No. 222270

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

**SCOPE OF WORK:** The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

**INTENDED USE:** The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

**DEFINITION OF MARKET VALUE:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

**STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS:** The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

#### **Exterior-Only Inspection Residential Appraisal Report** File No. 22270

## APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise
- I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).

# Exterior-Only Inspection Residential Appraisal Report File No. 22270

- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

#### SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

# Uniform Appraisal Dataset Definitions

File No. 22270

#### Condition Ratings and Definitions

C1 The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.\*

"Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2 The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

\*Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3 The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

\*Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

\*Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5 The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

\*Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6 The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

\*Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

## **Quality Ratings and Definitions**

- Q1 Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.
- Q2 Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residences constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high-quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.
- Q3 Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.
- Q4 Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.
- Q5 Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.
- Q6 Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure.

## Definitions of Not Updated, Updated, and Remodeled

#### Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical /functional deterioration.

#### Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

#### Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of square footage). This would include a complete gutting and rebuild.

## **Explanation of Bathroom Count**

The number of full and half baths is reported by separating the two values by a period. The full bath is represented to the left of the period. The half bath count is represented to the right of the period. Three-quarter baths are to be counted as a full bath in all cases. Quarter baths (baths that feature only toilet) are not to be included in the bathroom count.

Borrower: Redwood Holdings LLC	File No.:	: 22270
Property Address: 11575 Rancho Fiesta Rd	Case No	o.:
City: Carmel Valley	State: CA	Zip: 93924
Lender: Wednewood Inc		

# **Neighborhood Description**

Carmel Valley is primarily residential; the elementary schools, Middle Schools, and High School are generally proximate. Basic services are found in Carmel Valley Village and Mid-Valley Shopping Center, and more expansive services at the mouth of Carmel Valley; other schools, extended services and stable employment are located 2 to 20 miles away in Carmel, Monterey and Salinas. Parks and recreation are ample. There is a very wide range of property characteristics of residential properties Carmel Valley; so much so that it may be difficult for Sales Comparison Approach adjustments to fall within lender guidelines.

#### **Site Comments**

The preliminary report was not provided for review.

The subject has 1.08 acres; the majority is significantly sloped and some portions used as a driveway easement. Based on the street front site visit, plat map and Google Earth satellite imagery using the polygon function, the subject appears to have approximately 6,000 usable square feet of lot area.

The subject has significant unobstructed views of Carmel Valley and the Santa Lucia Mountains to the south; these views add significantly to the subject's market appeal.

The subject is accessed by way of a steep shared driveway. The driveway is one way with pull-outs at the hairpin turns. The driveway is maintained by the 8 properties (7 SFRs/1 vacant).

One part of the driveway easement cuts across some of the sloped portions of the driveway; no impact as this occurs on the sloped portion of the that would not otherwise be used. The driveway also cuts across just in front of the subject; this land is not calculated in the estimated usable lot area. No other adverse easements were noted at the time of inspections.

No external obsolescence noted at the time of inspection.

Considering the current residential zoning and General Plan designation for the subject property, the subject's current SFR use is the highest and best use as no other use, as improved or if vacant, would be legally permissible and maximally productive.

## **Additional Features**

The recent MLS indicates: "One of the best values and unique settings in Carmel Valley! This tranquil and spacious home has breathtaking panoramic views, a home studio/office with its own entrance, owned solar panels/Tesla battery backup, and other upgrades. Needs new windows and TLC but imagine the possibility of opening up the vistas further and adding your touches. Enjoy stunning scenery, sunrises and sunsets, and soaring hawks gliding over Carmel River and adjacent Garland Ranch Park. Known for its wineries, Carmel Valley is one of the sunniest places on the Peninsula with 300+ days of sun. Three miles east is the laid-back charm of Carmel Valley Villages cafes, wine tasting rooms, art galleries, and shops, and two miles west is the Mid-Valley shopping center. Carmel's fairytale cottages, shopping, restaurants, and art galleries is 12 miles away. Some additional upgrades include updated plumbing, a newer roof, and a recently painted exterior. This property is definitely worth the drive up."

The just prior MLS indicates: "Over looking Garland Ranch Regional Park (3500 acres) at an elevation of 600', this unique property offers views of Carmel Valley sunrises and sunsets that are not easily found. The Carmel Valley Village with its restaurants and shops is just 3 miles to the east and the mid-valley shopping center is just 2 miles to the west towards Carmel. Carmel's charm and the sands and surf of Carmel Beach on the Pacific Ocean are only 20 minutes away. Located just outside the summer fog line, this property enjoys up to 300+ days a year of California sun. Interior fire sprinkler system. Kitchen has reverse osmosis water filtration system. Stunning shop studio with 35 drawers and 35 cabinets finished in fine Beech Veneer with built-in sink. Built-in whole house vacuum system, new plumbing. Tesla Power Wall System providing battery back-up for 36 hours in case of electrical outage, fueled by Sun Power solar panels installed 2019 with new roof. New exterior paint."

The subject's solar photovoltaic system is indicted in the MLS as being owned. The subject appears to have an oversized garage.

## Condition of the Property

Continued from Condition of the Property: known functional obsolescence noted

# **Final Reconciliation**

Primary weight is given to the Sales Comparison Approach as it best reflects a buyer's reaction in this market. The Cost Approach is considered less reliable due the difficulty in estimating accrued depreciation on older structures. The income approach is not used as the neighborhood is predominantly owner occupied.

**Appraisal Report** 

Borrower: Redwood Holdings LLC	File No.:	: 22270
Property Address: 11575 Rancho Fiesta Rd	Case No	o.:
City: Carmel Valley	State: CA	Zip: 93924
Lender: Wednewood Inc		

The appraiser is not a home inspector. This report should not be relied upon to disclose any conditions present in the subject property. The appraisal report does not guarantee that the property is free of defects. A professional home inspection is recommended.

This appraisal may contain a digital signature; if so it is a digital image that complies with the USPAP standards.

No personal property was considered nor included in this evaluation.

See attached "appraiser certification". This appraisal report is intended for use in a mortgage finance transaction only. This appraisal report is intended for use by the lender/client and/or its assignees in a mortgage transaction. This report is not intended for any other use. My engagement in this assignment was not contingent upon developing or reporting predetermined results.

#### Additional Comments

DATE OF SALE: Comp 1 is adjusted up 40% due to the increase in market values since this sale.

LOCATION: Comp 3 is adjusted up due to fronting to a neighborhood access street. Comp 4 is adjusted upward due to being located on a cul-de-sac (the subject is technically on a cul-de-sac like situation, but the layout does not result in additional privacy). Comps 2, 3, 4 and 5 are adjusted down due to having superior driveway access.

SITE: Adjustments for differences in usable lot size are made at approximately \$25 per square foot of USABLE lot area. The estimated usable area lot area is shown and adjusted for on the Functional Utility line; unusable lot area is typically due to significant sloping and/or easements.

VIEW: The comps are adjusted for differences in view based on MLS narrative descriptions, MLS interior photos, interior inspections by the appraiser, exterior inspections by the appraiser, and/or conversations with Realtors. The subject and comp 1 have substantial views. Comps 2 and 3 have substantial views, but inferior to the subject's and are therefore adjusted upward. Comp 4 has a superior view and is adjusted down; both views are unobstructed, but the subject is at 525' and comp 4 is at 1,250'. Comp 5 has a substantially inferior view. Comp 6's view is slightly inferior.

DESIGN & APPEAL: Comp 2 is adjusted up due to having narrow market appeal of its Dutch Colonial cliffside design.

QUALITY OF CONSTRUCTION: The comps are adjusted for differences in quality based on MLS narrative descriptions, MLS interior photos, interior inspections by the appraiser, exterior inspections by the appraiser, and/or conversations with Realtors. Comp 1 is adjusted down for its higher quality finishes. Comp 4 is adjusted up due to having been constructed with inferior materials and finish.

CONDITION: The comps are adjusted for differences in condition based on MLS narrative descriptions, MLS interior photos, interior inspections by the appraiser, exterior inspections by the appraiser, and/or conversations with Realtors. Comp 1 sold in remodeled condition. Comps 3 and 4 sold in highly dated/worn condition and are adjusted upward.

ROOM COUNT: Adjustments for differences in bedroom count are made at \$25,000 for the difference between bedrooms. Adjustments for the differences in bathroom count are made at \$15,000 per half bathroom difference.

SQUARE FOOTAGE: Adjustments for differences in living area greater than 50 square feet are made at \$150 per square foot.

HEATING/COOLING: Comps with baseboard heat are adjusted upward.

GARAGE/CARPORT: Garage spaces adjusted at \$20,000 per space, and carports adjusted at \$5,000 per space.

AMENITIES: Comp 1 is adjusted down for its spa.

NEIGHBORHOOD: Comps are adjusted for differences in neighborhood market appeal relative to the

Borrower: Redwood Holdings LLC File No.: 22270		e No.: 22270
Property Address: 11575 Rancho Fiesta Rd	Ca	se No.:
City: Carmel Valley	State: CA	Zip: 93924
Lender: Wedgewood Inc		

#### subject.

RECONCILIATION: Greatest weight to comp 1 for proximity and similar characteristics with support from comp 2 for lowest gross adjustments and comp 4 for upper end view bracket. Despite being the most recent sale, no weight is given to comp 3; comp 3 was sold by a Realtor who does very little work in this area and based on conversations with no less than 3 highly experienced local Realtors, comp 3 was a low sale. Comp 5 is the most relevant pending sale and comp 6 the most relevant listing. Although comp 1 is very dated, is highly relevant because of the unique driveway it and the subject share.

Adjustments are based on discussions w/ local Realtors in conjunction w/ the appraiser's geographical competency and years of experience. Periodically, where applicable, paired sales analysis are performed to support these adjustments and periodic market analysis.

There are some single, net and gross adjustments that exceed guidelines; this is due to the wide range of property characteristics found in this area.

Some comps are from more than one mile away due to the low density of the area.

Dated sales are used due to the lack of more recent comparable sales.

The appraiser has not performed an appraisal or any service on the subject property in the last 36 months.

Please note that unless otherwise noted, the attic and crawl space were not inspected. Only a visual inspection of accessible areas was made.

Unless specifically noted, this appraisal is based on the special assumption that the subject does not have any structural or mechanical defects. It is assumed that all mechanical equipment and appliances are in satisfactory working condition, unless otherwise noted, and that the electrical/plumbing systems are also adequate, unless otherwise noted. The appraisers are not experts in these areas (not licensed or qualified home inspectors) and have not tested the subject to ensure that all of the above is in working condition. The pest control report (or termite report) and home inspection report, if any, were not provided to the appraisers. The appraisers are not experts in these fields and have not tested the subject in these regards.

The appraiser is not a home or environmental inspector. The appraiser provides an opinion of value. The appraisal does not guarantee that the property is free of defects or environmental problems. The appraiser performs an inspection of visible and accessible areas only. Mold may be present in areas the appraiser cannot see. If so desired by the user of this report, a professional home inspection or environmental inspection should be acquired.

Please read the important limiting conditions and scope of work comments on the page titled "Scope of Work, Assumptions and Limiting Conditions." Do not rely on this appraisal as a substitute for a home inspection.

The subject property was only inspected from the street and unless otherwise noted there were no visible signs of age or wear. Unless specifically noted, this appraisal is based on the special assumption that the subject does not have any structural or mechanical defects. It is assumed that all mechanical equipment and appliances are in satisfactory working condition, unless otherwise noted, and that the electrical/plumbing systems are also adequate, unless otherwise noted. The appraisers are not experts in these areas (not licensed or qualified home inspectors) and have not tested the subject to ensure that all of the above is in working condition. The pest control report (or termite report) and home inspection report, if any, were not provided to the appraisers. The appraisers are not experts in these fields and have not tested the subject in these regards.

No adverse conditions were noted from the front exterior/street.

The appraiser is not a home or environmental inspector. The appraiser provides an opinion of value. The appraisal does not guarantee that the property is free of defects or environmental problems. The appraiser performed an inspection from the street only. Mold may be present in areas the appraiser

# Appraiser Independence Certification

File No.: 22270

Borrower:	Redwood Holdings LLC			
Property Address:	11575 Rancho Fiesta Rd			
City:	Carmel Valley	County: Monterey	State: CA	Zip Code: 93924
Lender/Client:	Wedgewood Inc			

I do hereby certify, I have followed the appraiser independence safeguards in compliance with Appraisal Independence and any applicable state laws I may be required to comply with. This includes but is not limited to the following:

- I am currently licensed and/or certified by the state in which the property to be appraised is located. My license is the appropriate license for the appraisal assignment(s) and is reflected on the appraisal report.
- I certify that there have been no sanctions against me for any reason that would impair my ability to perform appraisals pursuant to the required guidelines.

I assert that no employee, director, officer, or agent of the Lender/Client, or any other third party acting as joint venture partner, independent contractor, appraisal company, appraisal management company, or partner on behalf of the Lender/Client, influenced or attempted to influence the development, reporting, result, or review of the appraisal through coercion, extortion, collusion, compensation, inducement, intimidation, bribery, or in any other manner.

I further assert that the Lender/Client has never participated in any of the following prohibited behavior in our business relationship:

1. Withholding or threatening to withhold timely payment or partial payment for the appraisal report;

Additional Comments:

- 2. Withholding or threatening to withhold future business, or demoting or terminating, or threatening to demote or terminate my services;
- 3. Expressly or implicitly promising future business, promotions, or increased compensation for my services;
- 4. Conditioning the ordering of the appraisal report or the payment of the appraisal fee or salary or bonus on my opinion, conclusion or valuation reached, or on a preliminary value estimate requested;
- 5. Requesting an estimated, predetermined, or desired valuation in the appraisal report, prior to the completion of the appraisal report, or requesting estimated values or comparable sales at any time prior to the completion of the appraisal report;
- 6. Providing an anticipated, estimated, encouraged or desired value for the subject property, or a proposed or target amount to be loaned to the Borrower, except that a copy of the sales contract may have been provided if the assignment was for a purchase transaction;
- 7. Providing stock or other financial or non-financial benefits to me or any entity or person related to me, my appraisal or appraisal management company, if applicable;
- 8. Any other act or practice that impairs or attempts to impair my independence, objectivity or impartiality, or violates law or regulation, including but not limited to, the Truth in Lending Act (TILA) and Regulation Z, or the Uniform Standards of Professional Appraisal Practice (USPAP).
