This 3225 square foot single family home has 5 bedrooms and 2.5 bathrooms. Subject details were taken from Tax. The subject property is assumed to be in average condition as per portal instructions. In order to take more proximate comparable to the subject it was necessary to exceed style and bed/bath count. Comparable Sale 2 condition has been exceeded to provide proximate and similar characteristics comps in the subject neighborhood. The utilized comps are as similar in GLA, Style and Age as possible. It was necessary to use a comparable listing with variance in garage/carport due to limited market activity in the subject's area. Garage count was verified by MLS comments and pics. Review of the aerial map identified golf club, school, commercial centers and busy streets. The area is primarily residential. All comps share similar characteristics to the subject and are located in reasonable proximity.. In regards to the total number of bedrooms the subject does conform to the area and is uniquely different from the homes on the same block. While the subject property has 5 bedrooms, the average property in the 1 mile radius has 4 bedrooms. In delivering final valuation, most weight has been placed on CS3 (similar GLA) and CL3 (close in proximity) as they are most similar to subject condition, gla and overall structure.
