Loan # 49595 File # 69212

Clarification of Intended Use & Intended User(s): The Intended User of		File # 69212	
Hoore are identified by the engueiner. The beautier is not as left and	of this appraisal report is the Lender/	Client. No additional Int	tended
Users are identified by the appraiser. The borrower is not an Intende	d User. A party receiving a copy of t	his report is not an Inter	nded
User. The Intended Use is to evaluate the property that is the subject	of this appraisal for a mortgage fina	nce transaction, subjec	t to
the stated scope of work, the reporting requirements of this appraisa	I report form, and the definition of Ma	arket Value, included in	the
report.			
Note: the "Scope of Work" decision is specific to the stated Intended	Use and was deemed appropriate fo	r the specifically named	ı
Intended User(s). Use of this appraisal for a purpose other than the s			
completed by the appraiser. Information communicating the scope of			
addition to the scope of work section.			
Cost Approach Warning: The purpose of Cost Approach is to help e	stimate and support the subject pror	erty's market value (NC	OT to
estimate the Replacement Cost of the subject improvements). Use of			
by the appraiser. Nothing set forth in this appraisal report is intended			
type of insurance coverage to be placed on the subject property. If us	-	_	
does not guarantee that any insurable value estimate inferred from the			
any loss that may be sustained. The appraiser recommends that an i			
	-		
may not be a reliable indication of replacement cost new for any date			ıg
costs of labor and materials, as well as changing building codes and	governmental regulations and requir	ements.	
The Annuaised Value is based on a Descendilla Funccius Time of lea	a than 20 days		
The Appraised Value is based on a Reasonable Exposure Time of les	s than 30 days.		
* the overall demand for real property. The reader is cautioned, and i			
apply only as of the Effective Date indicated. Future market condition	•		
economic conditions are unpredictable. Based on a review of MLS da			
buyers and sellers), list prices for available properties have continue			
remained low and the sale-to-list-price ratio of closed sales has rema			
common and there appears to be no pressure toward increased cont	ributions by sellers under current ma	rket conditions.	
Days-on-market (DOM) has remained consistent with or is lower than	DOM before the Coronavirus pander	mic. The reader is furthe	er
cautioned that market conditions can be unpredictable after disruptive	e events and depend heavily on supp	oly/demand which could	d also
be negatively affected by interest rates returning to normal (higher) le	evels. Past events have repeatedly pro-	roven that market condi	tions
may change suddenly and sale prices can change dramatically with I	ittle warning. Interested parties are a	dvised to consider poss	ible
changes in value, including the potential for a decline in value, in any	decision related to this transaction.		
COST APPROACH TO VALUE	E (not required by Fannie Mae)		
Provide adequate information for the lender/client to replicate the below cost figures and calculations.	, , , ,		
Support for the opinion of site value (summary of comparable land sales or other methods for estimating site value)	High site to val	ue ratio is typical of the si	uhiact's
market area. Site value has been derived by extraction and/or allocation of			
market area. Site value has been derived by extraction and/or anocation of	due to lack of available site sales data if	i the subjects market are	
			a.

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended user, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE:

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: to the following assumptions and limiting conditions:

The appraiser's certification in this report is subject

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.

 Because the appraiser is not an expert in the field of environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Loan # 49595

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report,
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending loan application). mortgage
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

Sales Comparison Analysis - Commentary

Methodology & Data: The Sales Comparison Analysis is the primary method of estimating the market value of SFR's through an analysis of sales of similar properties. This method assumes that sales of comparable properties, having similar physical and locational factors, will provide a reliable indicator of value for the subject property. The credibility of this approach depends upon the accuracy of the data collected, as well as the degree of comparability between each sale property and the subject property. Physical and neighborhood characteristics, functional utility or a combination of these attributes defined the search parameters. While a diverse array of transactions were initially considered for this analysis, the sales selected for direct comparison to the subject are those transactions which were most applicable to the subject and/or those sales utilized in order to bracket particular physical factors (consistent with common appraisal practice). The comparable properties were obtained from the same general market as the subject and represent competitive alternatives. Details of the transactions have been verified to the greatest extent possible by utilizing reliable sources and/or with parties involved in the transaction.

With the foregoing in mind, 5 closed comparable sales and 1 pending sale were selected and were considered to represent the best available sales and listing data. While the data utilized includes comparable properties from adjacent neighborhoods, dated sales and properties with differences that required significant adjustments, the comparable sales/listings were considered to be the most relevant data for direct comparison to the subject property.

• <u>Comparable Search Summary</u>: The subject neighborhood (see Neighborhood Boundaries on page 1) was searched using the following parameters: detached SFR's between 1,300 sf and 2,200 sf, year built between 1930 and 1975, site area between 5,000 sf and 15,000 sf, sales from 5/11/2021 and 5/10/2022.

Adjustments: For features which are dissimilar between the comparables and the subject, adjustments have been made leading to an indication of value for the subject property. Adjustments were extracted from available market data, including the comparable sales analyzed in this analysis, based on estimates of the market's reaction to differences in particular factors.

Positive adjustments for market conditions (time adjustments) are based on current MLS statistical data, the attached 1004MC analysis, sensitivity analysis using the adjusted comparables, and simple regression analysis developed using Spark (see attached exhibit), resulting in a positive .5% adjustment per month. Site adjustments are based on \$15/sf for significant differences in site utility. No adjustments were applied for minor differences in site area as market participants do not typically recognize very small differences in site utility. Some comparable site sizes were obtained directly from County Assessor's maps and may vary slightly from the site sizes reported by data reporting services.

Quality & condition ratings are consistent with UAD definitions (see attached) and some adjustments were made within the same "rating" for differing levels of overall quality and condition. Quality and condition adjustments are based on visual inspection by the appraiser, as well as M.L.S. data, descriptions and available photographs. While given the same quality "ratings" (based on UAD definitions), adjustments were applied to comps. #1-3 for quality differences due to differences in the level of upgrades and/or quality of construction. Condition adjustments were also applied to comps. #1 & 2 for superior levels of remodeling and overall condition. Although there are some significant age differences, no adjustments were made to the comparables for actual age, as "effective" ages may be different than actual ages. Differences in effective ages are accounted for in quality and condition ratings/adjustments. No adjustments were deemed to be necessary for differences in design (style) as the subject/comparable design styles are all generally acceptable in the subject's market area.

No adjustments were made for number of bedrooms, as all dwellings have similar functional utility and were compared on the basis of their overall gross living area (GLA). Bath adjustments are based on \$10,000/bath and GLA adjustments are based on \$115/SF (rounded). No adjustments were applied for minor differences in GLA as market participants do not typically recognize very small differences in living area.

Summary: Among the closed comparable sales that were analyzed, comps. #1-3 were generally deemed to be the most relevant overall and they established the range from which the estimated value was selected. The most important factors were considered to be Gross Living Area (GLA), date of sale, quality/condition, and proximity to the subject. Comps. #1 and 3 are the most similar in overall appeal and were given the most emphasis in developing this analysis. Comp. #2 is a recent sale and provides support for the value estimate.

While there is considerable weakness in the available market data, comparables #1-6 were deemed to be the best available closed sales and their use is considered to be reasonable and necessary in order to develop the sales comparison analysis.

Notification Regarding Appraiser's Employer, Company Address & Significant Real Property Appraisal Assistance: The appraiser signing the report is an employee of Clario Appraisal Network (CA AMC Registration #1256) and received no appraisal fee for the assignment. The appraiser is using the corporate address of the appraisal company. The appraiser is not based in the corporate office and is based in Thousand Oaks, CA. The appraiser is located roughly 24 miles from the subject property and has 40+ years appraising in the subject's market area.

Marquise Sumlin, an appraiser trainee who is also an hourly employee of Clario Appraisal Network (CA AMC Registration #1256), provided assistance in the completion of this appraisal assignment and the preparation of this appraisal report. His assistance was under the direct supervision of the appraiser signing the report and he is competent to perform these tasks. Significant real property appraisal assistance included analyzing the market data necessary to develop credible opinions and conclusions; reconciling the comparables selected; developing and reconciling the applicable approaches to value; and assisting the supervisory appraiser in arriving at the final opinion of value.

Yvonne Alamillo, an appraiser trainee who is also an hourly employee of Clario Appraisal Network (CA AMC Registration #1256), provided assistance in the completion of this appraisal assignment and the preparation of this appraisal report. Her assistance was under the direct supervision of the appraiser signing the report (Brian Mathews), and she is competent to perform these tasks. Significant real property appraisal assistance included researching the relevant characteristics of the subject property; researching comparable sale and listing data; researching the economic characteristics of the neighborhood.

Site Comments

The subject site is typical in size and has typical site utility for the neighborhood. The improvements appear to be well situated on the site and no apparent adverse easements, encroachments or other adverse site conditions were noted from off-site.

Note: I have not checked the title/land records for recorded easements and have reported only apparent easements, encroachments and/or other apparent adverse conditions. The title policy was not reviewed by appraiser.

- <u>Highest & Best Use</u>: The stated conclusion that the "highest and best" use of the subject property (as improved) is considered to be its present use as a single-family residential dwelling, is consistent with allowable uses under the subject site's zoning designation (1-family residential dwelling), and is supported by the contributory value of the improvements coupled with the remaining economic life of the structure.
- <u>Effective Age</u>: In estimating the effective age the appraiser has considered any physical deterioration, functional obsolescence, and/or external obsolescence observed from off-site on the effective date. No functional or external obsolescence was noted from off-site. Thus, the effective age only reflects physical deterioration. The exterior appears to be adequately maintained and the effective age is estimated to be less than the actual age of 69 years.

• Exterior-Only : Reconciliation

The Sales Comparison Analysis best reflects the conditions present in the Market Value definition, and best reflects the actions of buyers & sellers in the market. In addition, the market data presented in support of the Sales Comparison Analysis was verified by the appraiser and considered very reliable.

The Cost Approach was deemed to be a less reliable analysis, due to insufficient land sales data and the difficulty of estimating accrued depreciation. This approach was given secondary consideration and it supports the value conclusion of the Sales Comparison Analysis.

The Income Approach was not developed and is considered "not relevant" as similar properties (in the area) are not typically purchased for income production and there is insufficient rental data.

For the reasons stated above, the Sales Comparison Analysis was considered to be the most valid approach and was given the most emphasis in the final value conclusion.

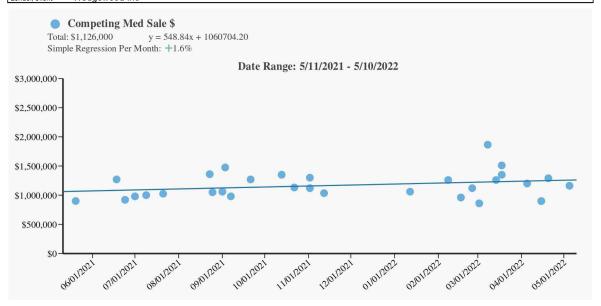

• Secure Signature

This report was transmitted electronically and includes a computer generated image, of my original signature, encrypted for security purposes. The report shall be as effective, enforceable and valid as if a "paper" version of this report was delivered.

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high-level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

03

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example:

3.2 indicates three full baths and two half baths.
