| Comments Regarding Pricing Strategy | | |
| <p>Subject property appears to be in average condition based on inspection. The subject is located in a neighborhood with easy access to the highway. The area has high market demand. The neighborhood has a shortage of homes on the market as there are more homes which have sold than listed in the past 6 months. Naturally, this shortage has enabled values to rise and this trend is expected to continue over the next 6 months. There were not enough similar active comparable found within the subject's immediate area. Due to this, it was necessary to exceed proximity guidelines in order to obtain active comps. Subject property and comps used are near a highway/busy road and commercial properties. The subjects close proximity to a highway/busy road and commercial properties are negative factors that could deter potential home buyers. Highway/busy road and commercial properties may bring added noise and business activity just beyond the property premises.</p> | | |
