Comments Regarding Pricing Strategy		
<p>The subject value was determined by the current listing and sold comps that are available to the market. The current comps available dictated my value at this point in time. It is my professional opinion that the subject value is accurate for the current market conditions and it is supported and bracketed by the best comps available. The price range is over 25% and all comps are not within 15% from the subjects value due to a lack of similar comps. This variance could not be avoided and the comps were chosen for their similarities to the subject.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
