Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The current report is showing a large variance in as is conclusions with the most current duplicate completed. The large variance appears due to current broker using more proximate comps with similar gla supporting a higher conclusion. The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
