Comments Regarding Pricing Strategy		
<p>I was unable to find any damages in the subject property based on my exterior inspection. Since this was an exterior inspection, the subject's interior condition cannot be established. Value is based on the assumption that subject has the characteristics in the report, and this information is based on the tax record information. Comparison analysis was done by collecting market data, selecting the most appropriate comparable properties, verifying market data, applying appropriate adjustments, and reconciling the various adjusted indicators of value into a value estimate. The sale price is more heavily reliant on comparable sales. In terms of lot size, sq ft, all comparisons were as close as possible to the subject. I searched the MLS and tax records for better sold and active comps, but I was unsuccessful. As a result, I included comps that were more than 0.5 miles away from the subject property and had both interior and exterior characteristics.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's Notes The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
