#### **Comments Regarding Pricing Strategy**

Comps were selected that best support the subject's immediate market, location and features. Thresholds were set based on square footage, quality of construction, age, amenities and features, school district, and proximity. Due to a dearth in comps in the area it may be necessary to expand the search parameters such as closed date, lot size guidelines. I always attempt to locate comps within one mile but this may not always be possible. I am not always able to locate comps with exact room count that are similar enough in all ways. I have used the most appropriate comps available. Due to limited comps available, list comps were despite not bracketing the GLA since they were considered to be reliable comparables. The most weight was given to the comps CS1 and LC1 that were most similar to the subject when all features were considered. Subject is located near park, worship place, school and commercial buildings. However, this will not affect the market value. The selected comps best represent the current value of the subject property out of all available comps within the set thresholds.
