Comments Regarding Pricing Strategy		
<p>The subject property is overall in average condition and it conforms to the neighborhood. Market value is based upon current market conditions, property condition, and comparable available at the time of evaluation. The subject is located in a residential area with access to major roads, park golf club, water bodies and commercial area, I have used similar location characteristic comparables in this report. The comparables utilized in the report have similar functional utility. Also, comparables are similar in overall comparison of subject property and are located in the market area of the subject property. Comparable shares values defining qualities with the subject in regard to GLA, condition and other attributes (no negative or adverse site condition noted), so the subject location characteristics don't affect its marketability. In delivering final valuation, most weight has been placed on CS1 and LC1 as they are most similar to subject GLA and overall structure. It was necessary to exceed the proximity to the subject guideline upto 2 mile in an effort to use the best available comparable from within the subject's market area.</p>
