Comments Regarding Pricing Strategy		
<p>Property values were rising rapidly and appears to of leveled off at record high values. There is still a low inventory supply – 30 year low which lead to a high demand. The Sold and List COMPS used in this report are most similar in condition to subject based on the information I have been provided and information I have obtained from the MLS and other various resources. Any external influences or different financing does not have an impact on marketability or value unless otherwise stated in this report. Attempted to use Sold and List COMPS in subject sub-division first, if not available, then I went out up to a 1 mile radius per MLS map and up to 6 months in time. In addition, Low days on market for most of the Sold and List COMPS contributed toward the recommended list price. All COMPS used in this report are most similar in GLA, style, year built, lot size, bedroom count and location that I could locate per MLS/Tax Star and other resources. Average Days on market were calculated using the most recent sold and list COMPS within subject sub-division/area and going back 6 months in time. Any items out of criteria tolerance (used the best and only available COMPS) may or may not be due to subject similarity, type of financing used or the inventory supply shortage which has no effect on the value unless otherwise noted in BPO report. As a result, some of the information provided is estimated. As a result of this report being my subjective opinion and I am NOT a licensed appraiser there will also be no price adjustments due to many unknowns such as condition and upgrades that I cannot completely confirm. Also, if no adjustments are made then there is no possibility that it will affect overall value. For a more accurate recommended list/sale price I would suggest an interior BPO and/or full appraisal. If unable to bracket per customary procedures it's most likely a result of subject uniqueness and/or the inventory supply shortage.</p>
