Comments Regarding Pricing Strategy		
<p>Normal search ranges for the subject property could not be maintained given the unique features of the subject property. An extended search of 2 miles was compulsory to encounter comparisons that fairly reflect an accurate price for the subject property. The additional area provides for a select number of comparisons that better value the subject property than those of closer proximity. The most weight on subject property final price held S2 and L2, due to most similarities to subject property. Property values and appeal are not affected by the location to the roadways and commercial.</p>
