Comments Regarding Pricing Strategy		
<p>Comparison analysis was done by collecting market data, selecting the most appropriate comparable properties, verifying market data, applying appropriate adjustments, and reconciling the various adjusted indicators of value into a value estimate. Market prices are increasing. Low-interest rates, low inventory, and increased demand are driving prices upward. The average marketing time is 60 days. All comps were the closest possible to the subject in lot size, sq ft., and age, no better sale and active comps were found; therefore I include comps over 1 mile far from the subject property with inferior and superior features. I went back 11 months, out in distance 1-miles, GLA 20%-30% variance, age 30 years variance, lot size within 0.10- 0.50 acre. The comps used are the best possible currently available comps within 1-mile and the adjustments are sufficient for this area to account for the differences in the subject and comparables. The estimated adjustments for the comparables noted are as follows; GLA \$30 per square feet variance, age \$6000 every year variance, bed \$6000 per bed count and view \$20000 Due to the lack of comparables, it was needed to use comps that vary in sale date. Due to lack of comparables it was needed to use comps that vary in location view. Due to a lack of inventory and of closed sales in the immediate area, it was necessary to extend the Year Built. The GLA varies slightly from the comps. This does not have an effect on the value as this is due to limited comps in that area. The subject remains strongly bracketed by these comps and results in an accurate evaluation.</p>		

Clear Capital Quality Assurance Comments Addendum

Reviewer's The broker's as-is conclusion reflects the market for the subject. Comps are within a reasonable distance, relatively current, and accurately reflect
Notes the subject's defining characteristics. Thus, the as-is conclusion appears to be adequately supported.
