<b>Comments Regarding Pricing Strategy</b>		
<p>Comps were selected that best support the subject's immediate market, location and features. Thresholds were set based on square footage, quality of construction, age, amenities and features, school district, and proximity. Due to a dearth in comps in the area it may be necessary to expand the search parameters such as proximity up to 2 miles, year built, lot size and GLA guidelines. I always attempt to locate comps within one mile but this may not always be possible. I am not always able to locate comps with exact room count that are similar enough in all ways. I have used the most appropriate comps available. The most weight was given to the comps CS2 and LC2 that were most similar to the subject when all features were considered. Due to limited comps available, list comps were despite not bracketing the GLA since they were considered to be reliable comparable. Subject is located near main road, school, worship place and commercial buildings. However, this will not affect the market value. The selected comps best represent the current value of the subject property out of all available comps within the set thresholds.</p>		

### Clear Capital Quality Assurance Comments Addendum
