Freddie Mac Form 2055 March 2005

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended user, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

Freddie Mac Form 2055 March 2005

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

Freddie Mac Form 2055 March 2005

- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

 C^2

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

Quality Ratings and Definitions

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

Quality Ratings and Definitions (continued)

0.3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

05

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Ω 6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

Definitions of Not Updated, Updated, and Remodeled

Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

Explanation of Bathroom Count

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

Example

3.2 indicates three full baths and two half baths.

Lender/Client	Wedgewood Inc				

FIRREA Certification Statement:

The appraiser certifies and agrees that this appraisal report was prepared in accordance with the requirements of Title XI of the Financial Institutions, Reform, Recovery, and Enforcement Act (FIRREA) of 1989, as amended (12 U.S.C. 3331 et seq.) and any applicable implementing regulations in effect at the time the appraiser signs this certification.

Comments:

The intended user of the report is the lender (Wedgewood Inc). The client and lender may rely upon this appraisal for internal use, including but not limited to, rendering a decision relative to servicing a mortgage. No other use is intended.

Unless stated in this report, the existence of hazardous material, which may or may not be present in the property, has not been observed by the appraiser. The appraiser has no knowledge of the existence of such materials on or in the property. The appraiser, however, is not qualified to detect such substances. The presence of potentially hazardous material may affect the value of the property. The value estimate is predicated on the assumption that there is no such material on or in the property. No responsibility is assumed for any conditions or the expertise and engineering knowledge required to discover hazardous materials. The client is urged to retain an expert in this field, if desired.

The appraiser has completed the report in accordance with the Uniform Standards of Professional Appraisal Practices (USPAP). It should be noted that while the appraiser has made every attempt to thoroughly inspect the subject property, appraiser is not qualified as a licensed contractor, plumber, electrician, surveyor, roofer or engineer. The scope of appraiser's inspection was thorough for the purpose of noting size, layout, amenities, depreciation, etc. as would be expected and necessary in the process of data collection per USPAP Standard Rule 1-1 and advisory opinion #2. If anyone relying on this report has reason to believe an inspection of a specific nature is warranted, then by all means the property qualified professional should be retained.

The appraiser has completed the report in accordance with the Uniform Standards of Professional Appraisal Practices (USPAP). Square footage calculations are approximations based on the local tax records for all comparables, with some adjustment made based on the appraiser's knowledge, measurement, or estimate based on exterior view of the comparable. It is assumed that this data is accurate; however, if it turns out to be different than that reported in this appraisal, the final opinion of value could be altered.

No employee, director, officer or agent of the lender, or any other third party acting as a joint venture partner, independent contractor, appraisal management company, or partner in behalf of the lender has influenced or attempted to influence the development, reporting, result or review of this assignment through coercion, extortion, collusion, compensation, instruction, inducement, intimidation, bribery or any other manner. I have not been contacted by anyone other than the intended user (lender/client as identified on the first page of the report), borrower or designated contact to make an appointment to enter the property. I agree to immediately report any unauthorized contacts either personally by phone or electronically to vendor management.

A State Law, effective as of 7/1/2011, requires that an owner of a dwelling unit intended for human occupancy shall install a carbon monoxide device, approved and listed by the State Fire Marshal pursuant to Section 13263, in each existing dwelling unit having a fossil fuel burning heater or appliance, fireplace, or an attached garage.

The installation of smoke and Carbon monoxide detectors could not be verified at this time.

The installation of a water heater with double straps could not be verified at this time.

• Exterior-Only: Neighborhood - Description

The subject's neighborhood is in the Paradise Hills area of San Diego. The neighborhood consists of condominiums, single family dwellings, apartment buildings and commercial property. The subject property has access to employment, retail shopping, schools, police/fire, recreational facilities, public transportation and other support services within a 1-2 mile radius. The nearby downtown area has average employment stability and overall average appeal to the marketplace. No significant negative factors were noted which could potential impact value and/or marketability of the subject property at this time.

• Exterior-Only : Neighborhood - Market Conditions

Within the subject's market area, the market value for single family properties has remained mostly stable over the recent 24 month period. The previous 0 to 6 month trend indicates a fluctuation in value within the subject's price range. The fluctuation in value is due to rising interest rates which have had an impact on the overall housing market over the most recent 6 month period. The MLS data over the recent 24 month period indicates stable market values and was given more weight at this time.

Utilizing data from the local MLS system, a comparison of the most recent 12 month period was analyzed against data for the period between 05/2021 thru 05/2022 and revealed stable market values over this time frame. Per MLS data, the average sales price over the recent 12 month period for single family properties within the subject's market area as defined on page one was reported as \$693,098 (121 sales). This average indicates mostly stable market values when compared to the average of \$679,874 (175 sales) as reported between 05/2021 thru 05/2022 for similar single family properties within the subject's market area.

Based on MLS data, there are 3 active listings, 9 pending sales and 62 sold properties over the previous 12 month period for similar single family properties within the subject's market area priced between \$550,000 to \$700,000. This indicates 5.9 sales per month with a .5 monthly supply. There is a shortage of supply for similar properties within the subject's market area and price range at this time. The average days on market were reported as 27 over the previous 12 month period.

• Exterior-Only: Unit Description - Condition of the Property

The appraisal report was completed as an exterior only inspection at the request of the lender. Details regarding the interior of the property were obtained from current MLS listing #230006208 and public records. A C3 condition rating was assigned based on the exterior inspection and the MLS listing. The MLS listing did not include interior photos, however, the listing agent provided some details regarding interior features. Based on the exterior inspection and the current MLS listing, an extraordinary assumption is employed to presume that the property is in a C3 condition as described by the attached UAD addendum. The use of an extraordinary assumption in the report may have an impact on the assignment results if there is a significant difference in the interior condition and overall quality of the improvements.

• Exterior-Only: Sales Comparison - Summary of Sales Comparison Approach

Comparable sales or comps are selected by the appraiser after market research of the relevant geographic market area. The appraiser has identified sales of properties with the most similar characteristics relative to the subject property from the recent market data available and utilized the most appropriate as "comps" in this report. Dollar adjustments are applied to the comparable sale to account for the estimated market impact of their respective relevant differences as compared to the subject. Positive dollar adjustments reflect a comp's inferiority and a negative adjustment reflects a comp's superiority as compared to the subject. Where a difference is not considered relevant or where there is insufficient market data to indicate a premium or discount typically paid for a specific feature, no dollar adjustment is applied. In the instance where no adjustment was utilized, the appraiser has considered the possibility of an adjustment but

Sunnlemental Addendum

Lender/Client	Wedgewood Inc				

File No. 53347

deemed it inappropriate in that particular case. The adjusted sales price is then reconciled by the appraiser to arrive at the appraiser's opinion of value for the subject property via the Sales Comparison Approach.

The comments contained within this appraisal report on the condition of the property are not based on the "Standards of Condition of the Property: Practice" as defined by the American Society of Home Inspectors (ASHI) or the California Real Estate Inspection Association (CREIA) and therefore are not to be considered a credible home inspection or home inspection report about the verified overall actual condition of the subject property. For the purpose of this report, unless obvious visible issues exist that can be photographically documented, it is assumed that there are no structural defects hidden by floor or wall coverings or any other hidden or unapparent conditions of the property; that all mechanical equipment and appliances are in working condition; and that all electrical components and the roofing are in average condition.

The comparables selected were all located within the subject's market area and bracketed the subject's dominant features of lot size, gross living area, bedroom/bathroom count, age/condition and location. These comps were believed to be the best available properties within the market area to accurately estimate the market value of the subject.

All comps have settled within 6 months of the inspection date of the subject property. Based on MLS data, properties within the subject's market area have experienced stable market values over the recent 24 month period. No adjustment was utilized at this time due to a fluctuation in values over the most recent 6 month period within the subject's price range as indicated by the attached 1004 MC form.

Lot adjustments were not utilized at this time as an appropriate adjustment could not be exacted from the market for differences in overall lot size and utility. Through Qualitative Analysis, the impact on value for differences in overall lot size and utility were considered during the final reconciliation of value and applied to the estimate of value indicated by the appraiser.

In the market analysis, adjustments for age and condition are considered as one adjustment. A typical purchaser perceives the overall condition of a property to be relative to its effective age. Of importance is what has been updated, replaced or renovated as opposed to considering the actual age of the home. The basis for any dollar adjustment would be the difference between the effective age of the subject and the effective age of the comparable, as it relates to total economic life. Comparables #1 thru #6 were given a C3 condition rating based on the definition indicated in the attached addendum. These comparables appear to bracketed the subject's overall condition and effective age requiring no significant adjustment at this time. Differences in upgrades or a lack of upgrades were considered during the final reconciliation of value and applied accordingly to the subject's estimate of value.

A condition adjustment was utilized for comps #7 and #8 due to superior or inferior overall condition and effect age as noted within the MLS listings. The condition adjustment was made per Matched Pairs Analysis.

A \$60/sf adjustment was utilized for gross living area differences greater than 100 square feet. This adjustment was based on approximately 10-15% of the average Sales Price/Gross Living Area for the settled sales utilized in this report. The gross living area adjustment was made based on Matched Pairs Analysis of comps #1 thru #6 at this time. This adjustment was rounded to the nearest 1,000 before being inserted into the sales comparison grid.

Due to differences in size, materials, and buyer preferences, exterior amenities were considered and given a minimal adjustment to account for the potential impact perceived by buyers within the market. All exterior items were given a minimal adjustment due to a lack of data verifying size and materials.

Adjustments for differences in bathroom count, parking, exterior amenities and heating/cooling systems were made per Matched Pairs Analysis of comps #1 thru #6 at this time. All features are considered relevant to potential buyers within the subject's market area, however, location, condition, bedroom/bathroom count and gross living area are the key factors driving price within the subject's overall market area at this time.

The subject and comparables sales utilized in the report may have some personal property items which conveyed during the sale of the property. The personal property items are considered to be insignificant and have no impact on the final sale price of the subject or comparables utilized in the report. No adjustment could be extracted from the market for any personal property item which may have conveyed with the sale of the comparables or subject property, therefore, no adjustment was utilized at this time

The subject is assumed to be in general compliance with local zoning regulations. Permits for improvements, which may have taken place since the time of construction, have not been presented to the appraiser. It is assumed that all required zoning and building use regulations for the subject property have been complied with or could be complied with by the owner in this report.

Most weight was given to comps #1 and #2 during the final reconciliation of value. Comps #1 and #2 are recently settled sales from within the subject's market area which bracket most of the subject's dominant features including lot size, bedroom/bathroom count, style/design, condition and location. Secondary weight was given to comps #3 thru #6 which were utilized to support features including gross living area, lot size, age/condition and bedroom/bathroom count. All comps were utilized to support the required adjustments made via Matched Pairs Analysis and to support the estimated market value of the subject property.

The price range indicated on page two of the report as well as on the attached 1004 MC form was selected after the estimate of value had been determined. The price range was selected in order to identify market trends for similar properties within the subject's market area which would appeal to potential buyers. A price range was not utilized during the process of selecting similar comparables to estimate the market value of the subject property.

Highest and best use:

The subject's site size, shape, and land-to-building ratio is adequate for the current improvements. The current structure on the subject site is financially feasible. The current structure on the subject site provides maximum return to the land. Based upon this assessment, it is the opinion of the appraiser that the subject is developed to its highest and best use. The highest and best use of the subject is projected based upon location, physical characteristics, past and proposed uses, and applicable zoning. The highest and best use of the subject "as if vacant" is for residential construction. It is the most applicable use, the previous or proposed use, and the most profitable use of the site. Surplus land, if any, may be held as investment or agriculture as an interim utility. The highest and best use of the subject "as improved" is its current use. The improvements have remaining economic life; are the probable future use; are the current and previous use and are legally permissible by zoning or probable future zoning; appear to be financially feasible; and are the maximally productive use available to

The definition of highest and best use is as follows: A real estate appraisal term meaning the legally and physically possible use that at the time of the appraisal, is most likely to produce the greatest net return to the land or buildings over a given period.

State Requirements:

AMC Registration # for ClearCapital, Inc - California 1256
