

#### **APPRAISAL OF REAL PROPERTY**

### **LOCATED AT:**

5432 Rozie Ave Tract 25974: Lot 115: Woodland Hills, CA 91367

### FOR:

Wedgewood Inc. 2025 Manhattan Beach Blvd Suite 100 Redondo Beach, CA 90278

### AS OF:

05/04/2023

### BY:

Robert Bronley

Robert Bronley The Appraisal Shoppe 22607 Collins Street Woodland Hills, CA. 91367

Wedgewood Inc. 2025 Manhattan Beach Blvd Suite 100 Redondo Beach, CA 90278

Re: Property: 5432 Rozie Ave

Woodland Hills, CA 91367

Borrower: Redwood Holdings LLC

File No.: 53404

In accordance with your request, we have appraised the above referenced property. The report of that appraisal is attached.

The purpose of this appraisal is to estimate the market value of the property described in this appraisal report, as improved, in unencumbered fee simple title of ownership.

This report is based on a physical analysis of the site and improvements, a locational analysis of the neighborhood and city, and an economic analysis of the market for properties such as the subject. The appraisal was developed and the report was prepared in accordance with the Uniform Standards of Professional Appraisal Practice.

The value conclusions reported are as of the effective date stated in the body of the report and contingent upon the certification and limiting conditions attached.

It has been a pleasure to assist you. Please do not hesitate to contact me or any of my staff if we can be of additional service to you.

Runly

Robert Bronley CERT. GEN. APPRAISER

AG004659

Freddie Mac Form 2055 March 2005

UAD Version 9/2011

Page 3 of 6

53404

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.

  Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

#### Exterior-Only Inspection Residential Appraisal Report 53404 File # 34156083

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

Freddie Mac Form 2055 March 2005

- 53404 File # 34156083
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

Supplemental Addendum	File No. 34156083
County Los Angeles	State CA 7in Code Q1367

A thorough search for comparable sales was made in this neighborhood. These comparable sales have significantly different (dates of sale, sizes, ages, conditions, and styles), in the appraiser's opinion, the comparable sales selected are the best indicators of the subject property's market value. Studies using match pairs serve as a basis for making the required adjustments

The validity of the sales comparison approach depends on the existence of recent sales of property which are comparable in location, size, age, condition, utility, construction and overall market appeal and compared with the subject property. The sale comparison approach has broad applicability and is persuasive when sufficient data is available. It usually provides the primary indication of value in sales of properties not purchased for their income producing characteristics. Every effort has been made to strictly here to the lenders guidelines and those of HUD. However due to the nature of the market it is not always possible to find comparable sales within a data pool for a particular area, that meet all of these guidelines. Therefore, it might have been necessary to use older sales, sales of competing homes in the area located further away than typically desired. In these instances, it is the appraiser's opinion that the comparable sales chosen represent the best data available and are the most reliable indicators of current market value.

There are no extraordinary assumptions are hypothetical conditions to this appraisal report. An extraordinary assumption presume as fact otherwise uncertain information about physical, legal, our economic characteristics of the subject property or about conditions external to the property, such as market conditions or trends, or the integrity of the data used in an analysis. A hypothetical condition that which is contrary to known facts about physical, legal, or economic characteristics of the subject property are about conditions external to the property, such as market conditions or trends

The adjustments that were warranted, were derived from match paired data from within this report, preparation of the work file, other jobs performed in the immediate market area over the past 36 interviews selling and listing agents from the immediate and surroundings market areas. There were no adjustments that exceeded the lenders guidelines of 10%. Not all adjustments in the sales comparison approach, and be directly extracted are supported by the available market data with a high degree of accuracy. Some adjustments have an element of subjectivity and professional judgment. The appraiser has applied based on prior observations of the reactions of typical/knowledgeable buyers and sellers in the marketplace. This method is a standard and well accepted practice within the appraisal industry. All interested parties are encouraged to have an understanding of basic valuation practices when appraising complex properties are when there is an extreme absent of like elements of comparison are in instances where the market data is consistent which to draw better supported adjustments and overall value.

### Comments on market data utilized in this report:

5408 Blanco Ave - This is a one story average quality traditional type style single-family residence situated West of Valley Cir., Boulevard in the Woodland Hills community within the city Los Angeles County Los Angeles with pool that was given a C4 rating due to a lack of upgrades and lack of interior MLS photos that has solar panels and considered good match paired data due to the following character him and location being West of Valley Cir., Boulevard, quality of construction, effective age, lot size/lot utility, similar one story traditional type style single-family residence, square footage range, overall interior utility, varying interior amenities/utility, and market appeal to the similarities and location within the immediate market area of Woodland Hills city Los Angeles with few other adjustments being required at this time.

File No. 3/156083

two more sales utilized located West of Valley Cir., Boulevard in the Woodland Hills community of Los Angeles and was considered good match paired data due to the following features such as quality of construction, effective age, traditional type style property, square footage range, overall interior utility, very interior amenities/utility, and market appeal due to the similarities and location within the immediate market area of Woodland Hills city Los Angeles. This two extra sales were selected in support of the final estimate of market value for the subject property. Comparables 6 and 7 were two recent active listings from the immediate market area West of Valley Cir., Boulevard in the Woodland Hills community within the city Los Angeles that were considered good match paired data due to the following attributes such as quality of construction, effective age, lot size/lot utility, square footage range, overall interior utility, very interior amenities/utility, and market appeal due to the similarities and location within the immediate market area. These two recent active listings were chosen in support of the final estimate of market value for the subject property.

The predominant value is higher than the final estimate of market value due to the subject properties average condition and lack of upgrades/remodeling over many years.

Sometimes there are discrepancies between the appraiser's inspection and the public records. Public records in some instances does not have the correct information recorded for the subjects property, interior room count, bathroom count, on-site amenities, and other interior, amenities. Public records cannot be relied upon in all circumstances when there is a discrepancy between the public records and the MLS records the appraiser will use the data that appears most accurate and reliable. There were no discrepancies found between the public records/MLS in this report.

The attached market condition sheet shows market stable at this time. Time adjustments were not applied to sales that were closed over 90 days ago from the effective date of this report. The adjustment dates to the contract date of sale.

Special assessment taxes are voter approved. Special assessment taxes can be extended by voters approval. Subject special assessments paid for flood control service open space program, storms sewers, public parks, County parks, trauma and emergency services. The special assessment taxes are paid yearly. The sales/listings utilized in this report have similar type special assessments. The special assessment tax is mailed with the real estate real property assessment tax statement.

A few of the sales/listings utilized as appraisal report had a different style. It is not always possible to find identical type sales in older neighborhoods that homes have been altered over the many years. It was necessary to use this data as recent match paired data in terms of square footage, quality of construction, and similar type condition. The typical buyer in this market is generally looking for location. The style and if the property is one story versus two stories is a matter of taste of the buyer, which has been verified by selling agents over the past years.

The lot size comes form the attached plat map. The attached legal sheet is correct.

There were other sales and listings found during the preparation of the work file. These sales and listings were not utilized at this time due to varying issues regarding quality of construction, superior type views, superior lot size and utility, off-site amenities such as guesthouse and,locational issues. This data is part of the work file.

Adjustments that have been made up based on match paired analysis of comparables utilized within this report are based on past market analysis of sales within the subjects market area.

The square footage adjustment made in this report is based on a match paired analysis of the comparables utilized in this report, and historical experience of the area. Square footage adjustment was determined to be \$50 per square foot.

There were no adjustments made for patios or other secondary amenities are energy-efficient items as there was pagood match paired data to indicate value for secondary amenities.

File No. 34156083

There were adjustments made for bedroom or for bath room counts as there were match paired data to indicate a value for bedroom or bath counts at this time in the marketplace.

There were no adjustments made for actual age as there is no conclusive data that suggest that differences in effective age warranted adjustments.

Lot size adjustments were made as paired data indicated adjustments were warranted at \$2.00 per square foot.

Primary amenities, such as pools, spa, guest units, tennis courts and views do hold value for homes in this area. There were adjustments made based on paired data in the area.

Paired data did indicate that adjustments were warranted for homes that had varied garage sizes.

Condition adjustments were made at some of the homes utilized in the report were of lesser or superior condition. Paired data indicated adjustments were warranted for homes that were in need of repair or in superior condition.

All adjustments that have been made are in the opinion of the appraiser to be good accurate adjustments and are based on a match paired data analysis.

Based upon physical conditions of the subject property and its effective age, the estimated remaining economic life is 50 years. Depreciation is calculated by the effective age divided by the economic life equals the remaining economic life. The Marshall and Swift cost book table for remaining economic life was utilized in this report.

The income approach was admitted and not the applicable due to the lack of sufficient compatible rental data and sales of rental properties required to establish a gross rent multiplier, this approach is not consider relevant in the appraisal single-family residential properties typically purchased for owner occupancy, as it does not accurately reflect the motivations or valuation progress applied by the typical purchaser of market

#### UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Condition Ratings and Definitions

C1

The improvements have been very recently constructed and have not previously been occupied. The entire structure and all components are new and the dwelling features no physical depreciation.\*

\*Note: Newly constructed improvements that feature recycled materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100% new foundation and the recycled materials and the recycled components have been rehabilitated/re-manufactured into like-new condition. Recently constructed improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (i.e., newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category either are almost new or have been recently completely renovated and are similar in condition to new construction.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

<u>ر د</u>

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

#### **Quality Ratings and Definitions**

Q1

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

Q4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

#### UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Quality Ratings and Definitions (continued)

05

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and upgrades.

Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

#### Definitions of Not Updated, Updated, and Remodeled

#### Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

#### Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

#### Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

#### **Explanation of Bathroom Count**

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

#### Example:

3.2 indicates three full baths and two half baths.
