Comments Regarding Pricing Strategy		
<p>I searched sales from the past 90 days and listings within a 1 mile radius from the subject. The search included properties within a 20% variance from the subjects living area, within a 30% variance from the subjects lot size and within +/- 15 years in age. The comps used are the best possible currently available comps within 1 mile and the adjustments are sufficient for this area to account for the differences in the subject and comparables. Based on the comps selected and other comps in the area, this is a fair representation of the subject property in the current market for this area. Other comps of similar GLA and features are listed and selling at around the price I have suggested for the subject. Subject should not take long to sell in the current market with general methods, and is likely to sell at or above listing price as property listing prices are going up in this general area. The subject is likely to sell within 90 days based on comps.</p>
