Comments Regarding Pricing Strategy

Subject bed/bath counts and lot size were taken from the subject old MLS listing as it was not available in the tax records. The sale and listing search was conducted based on fair market pricing in the subject area. The current suggested listing and/or sales price provided are most realistic but could change due to the current market trends. Due to limited comps in the area, it was necessary to expand to 2 miles along with the variance in pool, bed/bath counts, and lot size. I have used the most appropriate comps available. The most weight was given to the comps that were most similar to the subject when all features were considered. Comparable CS2 received multiple offers which resulted in an increased final sale price relative to list price. This will have no impact on subject value. In conclusion, the most weight was placed on CS2 and LC1, as they are most similar to subject condition and overall structure. Subject attributes are from tax records.
