<b>Comments Regarding Pricing Strategy</b>		
<p>The subject property is overall in average condition and it conforms to the neighborhood. All of the comparable uses in this report are located in the same and/or similar type of neighbourhood as the subject, having similar characteristics and market influence. Comps were selected that best support the subject's immediate market, location and features. The subject is located within reasonable proximity to commercial centers park and major roads. However this will not affect subjects marketability. It was necessary to exceed the +/-30% GLA , Year built +/-30, lot size and bed count in an effort to use the best available comparable from within the subject's market area. Within 1 mile, +/-30% GLA , Year built +/-30, there were limited comparable available in the subject neighborhood. Therefore it was necessary to exceed the proximity up to 2 miles. Unable to bracket subject gla bead bath count lot size due to the limitation of similar properties in that area. Variance is minimal. This does not have a significant impact on subject pricing. To maximize the accuracy of initial valuation, I have elected to increase the time span of closed sales past the favorable 6-month window to find comparable that required the fewest net adjustment. In delivering final valuation, most weight has been placed on CS3 and CL2 as they are most similar to subject condition and overall structure. Market value is based upon current market conditions, days on market, location, property condition, and comparable available at the time of evaluation. Subject details have taken from tax.</p>		

## Clear Capital Quality Assurance Comments Addendum
