The RE market has decreased by approximately 5% over the last 12 months. With such an inventory supply shortage (which is increasing), recommended list/sale prices quickly increased due to high property demand which has now leveled off due to higher interest rates. However, property listings are still not in line with recent Sold properties for a more stable market. Mostly conventional loans are being used for financing. Subject is located near schools, shopping, casino and parks. If gated or patrolling security, I ALWAYS make every attempt and effort to gain entry past security, which I normally do.

#### Comments Regarding Pricing Strategy

Property values were rising rapidly and have leveled off near record high values over the 2 last years. Property vales are either stable or somewhat decreasing. There was and still is a low inventory supply – 30 year low which lead to a high demand before higher interest rates slowed the market. However, property values have dropped by approximately 5% in just the last 12 months. The Sold and List COMPS used in this report are most similar in condition to subject based on the information I have been provided and information I have obtained from the MLS and other various resources. Any external influences or different financing does not have an impact on marketability or value unless otherwise stated in this report. Attempted to use Sold and List COMPS in subject sub-division first, if not available, then I went out up to a 1 mile radius per MLS map and up to 6 months in time. In addition, Low days on market for most of the Sold and List COMPS contributed toward the recommended list price. All COMPS used in this report are most similar in GLA, style, year built, lot size, bedroom count and location that I could locate per MLS/Tax Star and other resources. Average Days on market were calculated using the most recent sold and list COMPS within subject sub-division/area and going back 6 months in time. Any items out of criteria tolerance (used the best and only available COMPS) may or may not be due to subject similarity, type of financing used or the inventory supply shortage which has no effect on the value unless otherwise noted in BPO report. As a result, some of the information provided may be estimated.
