Comments Regarding Pricing Strategy

The value of the subject was derived by trying to stay within the range of the listed and sold comparable, and holding more weight to those comparables that were most similar overall. Subject is unique in age, lot size and view to its neighborhood. Even after exceeding all criteria in a mile, I was unable to get similar age, lot size and view active comparables. Necessary adjustments were made. Used sales over 3 months old due to the lack of more recent sales from the subject's immediate area. To find similar criteria comparables, it was necessary to exceed condition, pool, view, age, bed count and lot size. Eventhough subject is located near educational institutions, water bodies, highway, park and commercial buildings. This will have no impact on subject value. Due to limited comparable from same location, it was necessary to use comparables from across the highway and RR track. However, this won't affect the market value. In delivering final valuation, most weight has been placed on CS3 and LC3, as they are most similar to subject condition and overall structure. Subject attributes are from Tax record.
