Freddie Mac Form 2055 March 2005

#### Exterior-Only Inspection Residential Appraisal Report File # 34546959

54784

This report form is designed to report an appraisal of a one-unit property or a one-unit property with an accessory unit; including a unit in a planned unit development (PUD). This report form is not designed to report an appraisal of a manufactured home or a unit in a condominium or cooperative project.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the intended use, intended user, definition of market value, or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to the certifications are also not permitted. However, additional certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser's continuing education or membership in an appraisal organization, are permitted.

SCOPE OF WORK: The scope of work for this appraisal is defined by the complexity of this appraisal assignment and the reporting requirements of this appraisal report form, including the following definition of market value, statement of assumptions and limiting conditions, and certifications. The appraiser must, at a minimum: (1) perform a visual inspection of the exterior areas of the subject property from at least the street, (2) inspect the neighborhood, (3) inspect each of the comparable sales from at least the street, (4) research, verify, and analyze data from reliable public and/or private sources, and (5) report his or her analysis, opinions, and conclusions in this appraisal report.

The appraiser must be able to obtain adequate information about the physical characteristics (including, but not limited to, condition, room count, gross living area, etc.) of the subject property from the exterior-only inspection and reliable public and/or private sources to perform this appraisal. The appraiser should use the same type of data sources that he or she uses for comparable sales such as, but not limited to, multiple listing services, tax and assessment records, prior inspections, appraisal files, information provided by the property owner, etc.

INTENDED USE: The intended use of this appraisal report is for the lender/client to evaluate the property that is the subject of this appraisal for a mortgage finance transaction.

INTENDED USER: The intended user of this appraisal report is the lender/client.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The appraiser's certification in this report is subject to the following assumptions and limiting conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it, except for information that he or she became aware of during the research involved in performing this appraisal. The appraiser assumes that the title is good and marketable and will not render any opinions about the title.
- 2. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in this appraisal report whether any portion of the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 3. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.
- 4. The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the research involved in performing this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist.

  Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
- 5. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that the completion, repairs, or alterations of the subject property will be performed in a professional manner.

## Exterior-Only Inspection Residential Appraisal Report 54784 34546959

APPRAISER'S CERTIFICATION: The Appraiser certifies and agrees that:

- 1. I have, at a minimum, developed and reported this appraisal in accordance with the scope of work requirements stated in this appraisal report.
- 2. I performed a visual inspection of the exterior areas of the subject property from at least the street. I reported the condition of the improvements in factual, specific terms. I identified and reported the physical deficiencies that could affect the livability, soundness, or structural integrity of the property.
- 3. I performed this appraisal in accordance with the requirements of the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 4. I developed my opinion of the market value of the real property that is the subject of this report based on the sales comparison approach to value. I have adequate comparable market data to develop a reliable sales comparison approach for this appraisal assignment. I further certify that I considered the cost and income approaches to value but did not develop them, unless otherwise indicated in this report.
- 5. I researched, verified, analyzed, and reported on any current agreement for sale for the subject property, any offering for sale of the subject property in the twelve months prior to the effective date of this appraisal, and the prior sales of the subject property for a minimum of three years prior to the effective date of this appraisal, unless otherwise indicated in this report.
- 6. I researched, verified, analyzed, and reported on the prior sales of the comparable sales for a minimum of one year prior to the date of sale of the comparable sale, unless otherwise indicated in this report.
- 7. I selected and used comparable sales that are locationally, physically, and functionally the most similar to the subject property.
- 8. I have not used comparable sales that were the result of combining a land sale with the contract purchase price of a home that has been built or will be built on the land.
- 9. I have reported adjustments to the comparable sales that reflect the market's reaction to the differences between the subject property and the comparable sales.
- 10. I verified, from a disinterested source, all information in this report that was provided by parties who have a financial interest in the sale or financing of the subject property.
- 11. I have knowledge and experience in appraising this type of property in this market area.
- 12. I am aware of, and have access to, the necessary and appropriate public and private data sources, such as multiple listing services, tax assessment records, public land records and other such data sources for the area in which the property is located.
- 13. I obtained the information, estimates, and opinions furnished by other parties and expressed in this appraisal report from reliable sources that I believe to be true and correct.
- 14. I have taken into consideration the factors that have an impact on value with respect to the subject neighborhood, subject property, and the proximity of the subject property to adverse influences in the development of my opinion of market value. I have noted in this appraisal report any adverse conditions (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) observed during the inspection of the subject property or that I became aware of during the research involved in performing this appraisal. I have considered these adverse conditions in my analysis of the property value, and have reported on the effect of the conditions on the value and marketability of the subject property.
- 15. I have not knowingly withheld any significant information from this appraisal report and, to the best of my knowledge, all statements and information in this appraisal report are true and correct.
- 16. I stated in this appraisal report my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the assumptions and limiting conditions in this appraisal report.
- 17. I have no present or prospective interest in the property that is the subject of this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or opinion of market value in this appraisal report on the race, color, religion, sex, age, marital status, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property or on any other basis prohibited by law.
- 18. My employment and/or compensation for performing this appraisal or any future or anticipated appraisals was not conditioned on any agreement or understanding, written or otherwise, that I would report (or present analysis supporting) a predetermined specific value, a predetermined minimum value, a range or direction in value, a value that favors the cause of any party, or the attainment of a specific result or occurrence of a specific subsequent event (such as approval of a pending mortgage loan application).
- 19. I personally prepared all conclusions and opinions about the real estate that were set forth in this appraisal report. If I relied on significant real property appraisal assistance from any individual or individuals in the performance of this appraisal or the preparation of this appraisal report, I have named such individual(s) and disclosed the specific tasks performed in this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in this appraisal report; therefore, any change made to this appraisal is unauthorized and I will take no responsibility for it.

## Exterior-Only Inspection Residential Appraisal Report File # 3.

- 54784 File # 34546959
- 20. I identified the lender/client in this appraisal report who is the individual, organization, or agent for the organization that ordered and will receive this appraisal report.
- 21. The lender/client may disclose or distribute this appraisal report to: the borrower; another lender at the request of the borrower; the mortgagee or its successors and assigns; mortgage insurers; government sponsored enterprises; other secondary market participants; data collection or reporting services; professional appraisal organizations; any department, agency, or instrumentality of the United States; and any state, the District of Columbia, or other jurisdictions; without having to obtain the appraiser's or supervisory appraiser's (if applicable) consent. Such consent must be obtained before this appraisal report may be disclosed or distributed to any other party (including, but not limited to, the public through advertising, public relations, news, sales, or other media).
- 22. I am aware that any disclosure or distribution of this appraisal report by me or the lender/client may be subject to certain laws and regulations. Further, I am also subject to the provisions of the Uniform Standards of Professional Appraisal Practice that pertain to disclosure or distribution by me.
- 23. The borrower, another lender at the request of the borrower, the mortgagee or its successors and assigns, mortgage insurers, government sponsored enterprises, and other secondary market participants may rely on this appraisal report as part of any mortgage finance transaction that involves any one or more of these parties.
- 24. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.
- 25. Any intentional or negligent misrepresentation(s) contained in this appraisal report may result in civil liability and/or criminal penalties including, but not limited to, fine or imprisonment or both under the provisions of Title 18, United States Code, Section 1001, et seq., or similar state laws.

SUPERVISORY APPRAISER'S CERTIFICATION: The Supervisory Appraiser certifies and agrees that:

- 1. I directly supervised the appraiser for this appraisal assignment, have read the appraisal report, and agree with the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 2. I accept full responsibility for the contents of this appraisal report including, but not limited to, the appraiser's analysis, opinions, statements, conclusions, and the appraiser's certification.
- 3. The appraiser identified in this appraisal report is either a sub-contractor or an employee of the supervisory appraiser (or the appraisal firm), is qualified to perform this appraisal, and is acceptable to perform this appraisal under the applicable state law.
- 4. This appraisal report complies with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place at the time this appraisal report was prepared.
- 5. If this appraisal report was transmitted as an "electronic record" containing my "electronic signature," as those terms are defined in applicable federal and/or state laws (excluding audio and video recordings), or a facsimile transmission of this appraisal report containing a copy or representation of my signature, the appraisal report shall be as effective, enforceable and valid as if a paper version of this appraisal report were delivered containing my original hand written signature.

#### **Exterior-Only: Neighborhood - Description**

The subject is located in conforming neighborhood consisting of average to good quality, detached single family dwellings and condominiums. Shopping, schools, and parks are in close proximity to the subject. Employment centers are located a typical distance away. Public transportation and major freeway access are available and in close proximity. There are no apparent adverse locational factors affecting the subject's appeal, marketability, or value.

#### • Exterior-Only : Neighborhood - Market Conditions

LOS ANGELES – A surge in mortgage interest rates and a shortage of homes for sale suppressed California home sales in April, while the statewide median home price climbed above the \$800,000 level for the first time in six months, [according to] the CALIFORNIA ASSOCIATION OF REALTORS® (C.A.R.).

Closed escrow sales of existing, single-family detached homes in California totaled a seasonally adjusted annualized rate of 267,880 in April, according to information collected by C.A.R. from more than 90 local REALTOR® associations and MLSs statewide. The statewide annualized sales figure represents what would be the total number of homes sold during 2023 if sales maintained the April pace throughout the year. It is adjusted to account for seasonal factors that typically influence home sales. April's sales pace was down 4.7 percent on a monthly basis from 281,050 in March and down 36.1 percent from a year ago, when a revised 418,970 homes were sold on an annualized basis. Sales of existing single-family homes in California remained below the 300,000-unit pace for the seventh consecutive month.

"While home sales declined in April, the market is getting more competitive as we're seeing time on the market before selling down to 20 days in April from 33 days in January and the share of homes sold above asking price double from one in five at the beginning of the year to more than two in five in April," said C.A.R. President Jennifer Branchini, a Bay Area REALTOR®. "This increase in market competition continued to provide support to the statewide median home price in April, which climbed above \$800,000 for the first time in six months."

California's median home price surpassed \$800,000 in April for the first time since October 2022, increasing 3.0 percent from March's \$791,490 to \$815,340. Despite the price improvement since early this year, April's median price was lower on a year-over-year basis for the sixth consecutive month, declining 7.8 percent from the revised \$884,680 recorded last April. The sizable drop in median price from last year was due partly to the strong price surge in early 2022 when homebuyers rushed into the market to take advantage of low rates before the Fed began aggressively raising rates.

"Home sales remained soft as the lock-in effect continued to tighten housing supply and keep would-be sellers from listing their homes for sale, which contributed to a 30 percent year-over-year drop in new statewide active listings - the largest drop since May 2020 when the pandemic shutdown took place," said C.A.R. Senior Vice President and Chief Economist Jordan Levine. "A surge in borrowing costs as mortgage rates surpassed 7% in late February and early March also contributed to the market weakness, as many transactions that opened in those two months were closed in April."

As such, C.A.R. has revised its 2023 Housing Market Forecast and projects existing single-family home sales to reach 279,900 units in 2023, a decline of 18.2 percent from the 342,000 units sold in 2022. While home prices in general are expected to improve in the second half of the year, the California median home price is projected to decrease 5.6 percent to \$776,600 in 2023, down from the annual median price of \$822,300 recorded in 2022. The updated projection on the statewide median price is an increase from the estimate of \$758,600 forecast last October. C.A.R. also projects the 30-year fixed mortgage interest rate to average 6.3 percent for the year.

Marketing time appears to be 3 months with balance in supply and demand. Property values appears to be stable and in process of revitalization where properties listed at or below market value have shown multiple offers trend results. At present time, there is no adverse conditions which would dramatically affect the above stated trends.

#### • Exterior-Only : Subject - Overall Condition of the Property

Subject has permanent attached floor heating unit and marked under "Other" in the Improvement Section, Heating/Cooling and typical in the area as most comparables have similar heating features and acceptable to the market.

#### Highest and Best Use Comment:

The subject's site is considered to be physically available for development. Use of the subject's site is restricted by the zoning district. The subject is located in a residential area. Highest and Best Use of the site is considered to be single family, detached, residential use. This use is permitted under the zoning ordinance and is considered the only use that is economically feasible for the size and location of the site. As of the effective date, the subject was improved, single family, detached, residential use, which is the maximally productive use of the site and was the highest and best use of the land as improved. As of the effective date of the appraisal, the subject property did not suffer any known easements. No easements are recorded on the deed, which is attached to this report. The most probable buyer for the subject property was, as of the effective date of the appraisal, considered to be an owner occupier assisted with market typical mortgage financing.

#### • Exterior-Only : Sales Comparison Analysis - Summary of Sales Comparison Approach

The comparables utilized were best available at time of the inspection. Comparables #2 & #4 required location adjustment for being located near freeway. No bedroom adjustment warranted as bedroom count is adjusted within GLA. Adjustment factors of \$\$2500 per Half Bath, \$5000 per FAU/Central, \$5000 per Garage were derived from immediate marketplace and/or paired match analysis. Living area adjustment of \$40/sf and lot size adjustment of \$3/sf are extracted from subject's market place, although no adjustment was necessary if living size difference is less than 100 Sqft and lot size difference is less than 1000 Sqft. All comparables were considered in arriving at the final estimated market value. Appraisal was based on estimated exposure time of 3 months. All comparables were not REO or Short sales, all information was verified thru public sources and/or MLS listings.

There were no special concessions noted on selected closed and listing comparables, all information were verified thru MLS listing remarks and descriptions.

The subject and its comparables are located within same immediate area as described in location boundaries.

The subject final reconciled value is estimated at \$900,000 based on comparison analysis. There were sufficient number of similar comparables sold within last 6 months whereas appraiser has reviewed all possible comparables in the comparison analysis and has selected the most compatible to subject which required minimal adjustments compared to discarded comparables. All comparables were selected from broad comparables research whereas such comparables required minimal adjustments due to similar features as subject's. The appraiser assumes the selected comparables best represent subject's final reconciled value.

Most weight was given to Comparable #1 due to recent close of date of sale, #3 due to GLA range similarity.

The report was developed in adherence to the lenders Appraiser Independence Requirements as stated in Fannie Mae Appraisal guidelines, https://www.fanniemae.com/content/fact\_sheet/appraiser-independence-requirements.pdf The report was prepared in accordance with Title XI of FIRREA.

A reasonable exposure time for the subject property developed independently from the stated marketing time is 3 months.

54784 Market Conditions Addendum to the Appraisal Report File No. 34546959 The purpose of this addendum is to provide the lender/client with a clear and accurate understanding of the market trends and conditions prevalent in the subject neighborhood. This is a required addendum for all appraisal reports with an effective date on or after April 1, 2009. Property Address 5950 Simpson Ave City North Hollywood Borrower Redwood Holdings LLC Instructions: The appraiser must use the information required on this form as the basis for his/her conclusions, and must provide support for those conclusions, regarding housing trends and overall market conditions as reported in the Neighborhood section of the appraisal report form. The appraiser must fill in all the information to the extent it is available and reliable and must provide analysis as indicated below. If any required data is unavailable or is considered unreliable, the appraiser must provide an explanation. It is recognized that not all data sources will be able to provide data for the shaded areas below; if it is available, however, the appraiser must include the data in the analysis. If data sources provide the required information as an average instead of the median, the appraiser should report the available figure and identify it as an average. Sales and listings must be properties that compete with the subject property, determined by applying the criteria that would be used by a prospective buyer of the subject property. The appraiser must explain any anomalies in the data, such as seasonal markets, new construction, foreclosures, etc. Prior 7-12 Months Inventory Analysis Prior 4-6 Months Current - 3 Months Overall Trend Stable Stable Declining Total # of Comparable Sales (Settled) 11 Increasing Absorption Rate (Total Sales/Months) Increasing Declining 3.67 3.00 3.67 Increasing Total # of Comparable Active Listings Declining Stable 3 4 5 Months of Housing Supply (Total Listings/Ab.Rate) 1.4 Declining Stable Increasing 8.0 1.3 Median Sale & List Price, DOM, Sale/List % Current - 3 Months Prior 7-12 Months Prior 4-6 Months Overall Trend X Stable Increasing Declining Median Comparable Sale Price 955,000 1,130,000 1,025,000 Median Comparable Sales Days on Market Declining Stable Increasing 30 14 22 Stable Stable Median Comparable List Price Declining 975,000 1,184,500 1,070,000 Increasing Median Comparable Listings Days on Market Declining Increasing 86 14 36 X Stable Median Sale Price as % of List Price Declining Increasing 97.9 95.4 96.1 **X** Stable Increasing Seller-(developer, builder, etc.)paid financial assistance prevalent? **X** No Declining Yes Explain in detail the seller concessions trends for the past 12 months (e.g., seller contributions increased from 3% to 5%, increasing use of buydowns, closing costs, condo The data used in the grid above does not indicate there were any concessions associated with the reported transactions. However, this is not a mandatory reporting field for agents and there may be some transactions that do include concessions, but have not been reported. It is beyond the scope of this assignment to confirm each sale used in the Market Conditions Report X No Are foreclosure sales (REO sales) a factor in the market? If yes, explain (including the trends in listings and sales of foreclosed properties). Yes Research of public records and MLS listings show minimal foreclosure activity in the subject's immediate area Cite data sources for above information. RealQuest, MLS data, DQnews.com and/or local news Summarize the above information as support for your conclusions in the Neighborhood section of the appraisal report form. If you used any additional information, such as an analysis of pending sales and/or expired and withdrawn listings, to formulate your conclusions, provide both an explanation and support for your conclusions. The market research analysis indicates that values have been in a stable state. Supporting factors also indicate that days on the market for the previous sales and listings have also been relatively stable (exposure time), giving strong support for the estimated within 3 months marketing time. All conclusions were based on information obtained within the neighborhood boundaries, therefore giving a more accurate conclusion. If the subject is a unit in a condominium or cooperative project, complete the following: Project Name: Current - 3 Months Subject Project Data Prior 7-12 Months Prior 4–6 Months Overall Trend Total # of Comparable Sales (Settled) Stable Declining Increasing Absorption Rate (Total Sales/Months) Increasing Stable Declining Total # of Active Comparable Listings Stable Declining Increasing Months of Unit Supply (Total Listings/Ab.Rate) Declining Stable Increasing Are foreclosure sales (REO sales) a factor in the project? If yes, indicate the number of REO listings and explain the trends in listings and sales of Yes No foreclosed properties. Summarize the above trends and address the impact on the subject unit and project. Signature Signature Supervisory Appraiser Name Appraiser Name

#### UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Condition Ratings and Definitions

C1

The improvements have been recently constructed and have not been previously occupied. The entire structure and all components are new and the dwelling features no physical depreciation.

Note: Newly constructed improvements that feature recycled or previously used materials and/or components can be considered new dwellings provided that the dwelling is placed on a 100 percent new foundation and the recycled materials and the recycled components have been rehabilitated/remanufactured into like-new condition. Improvements that have not been previously occupied are not considered "new" if they have any significant physical depreciation (that is, newly constructed dwellings that have been vacant for an extended period of time without adequate maintenance or upkeep).

C2

The improvements feature no deferred maintenance, little or no physical depreciation, and require no repairs. Virtually all building components are new or have been recently repaired, refinished, or rehabilitated. All outdated components and finishes have been updated and/or replaced with components that meet current standards. Dwellings in this category are either almost new or have been recently completely renovated and are similar in condition to new construction.

Note: The improvements represent a relatively new property that is well maintained with no deferred maintenance and little or no physical depreciation, or an older property that has been recently completely renovated.

C3

The improvements are well maintained and feature limited physical depreciation due to normal wear and tear. Some components, but not every major building component, may be updated or recently rehabilitated. The structure has been well maintained.

Note: The improvement is in its first-cycle of replacing short-lived building components (appliances, floor coverings, HVAC, etc.) and is being well maintained. Its estimated effective age is less than its actual age. It also may reflect a property in which the majority of short-lived building components have been replaced but not to the level of a complete renovation.

C4

The improvements feature some minor deferred maintenance and physical deterioration due to normal wear and tear. The dwelling has been adequately maintained and requires only minimal repairs to building components/mechanical systems and cosmetic repairs. All major building components have been adequately maintained and are functionally adequate.

Note: The estimated effective age may be close to or equal to its actual age. It reflects a property in which some of the short-lived building components have been replaced, and some short-lived building components are at or near the end of their physical life expectancy; however, they still function adequately. Most minor repairs have been addressed on an ongoing basis resulting in an adequately maintained property.

C5

The improvements feature obvious deferred maintenance and are in need of some significant repairs. Some building components need repairs, rehabilitation, or updating. The functional utility and overall livability is somewhat diminished due to condition, but the dwelling remains useable and functional as a residence.

Note: Some significant repairs are needed to the improvements due to the lack of adequate maintenance. It reflects a property in which many of its short-lived building components are at the end of or have exceeded their physical life expectancy but remain functional.

C6

The improvements have substantial damage or deferred maintenance with deficiencies or defects that are severe enough to affect the safety, soundness, or structural integrity of the improvements. The improvements are in need of substantial repairs and rehabilitation, including many or most major components.

Note: Substantial repairs are needed to the improvements due to the lack of adequate maintenance or property damage. It reflects a property with conditions severe enough to affect the safety, soundness, or structural integrity of the improvements.

#### **Quality Ratings and Definitions**

Q-

Dwellings with this quality rating are usually unique structures that are individually designed by an architect for a specified user. Such residences typically are constructed from detailed architectural plans and specifications and feature an exceptionally high level of workmanship and exceptionally high-grade materials throughout the interior and exterior of the structure. The design features exceptionally high-quality exterior refinements and ornamentation, and exceptionally high-quality interior refinements. The workmanship, materials, and finishes throughout the dwelling are of exceptionally high quality.

Q2

Dwellings with this quality rating are often custom designed for construction on an individual property owner's site. However, dwellings in this quality grade are also found in high-quality tract developments featuring residence constructed from individual plans or from highly modified or upgraded plans. The design features detailed, high quality exterior ornamentation, high-quality interior refinements, and detail. The workmanship, materials, and finishes throughout the dwelling are generally of high or very high quality.

#### UNIFORM APPRAISAL DATASET (UAD) DEFINITIONS ADDENDUM

(Source: Fannie Mae UAD Appendix D: UAD Field-Specific Standardization Requirements)

#### Quality Ratings and Definitions (continued)

#### Q3

Dwellings with this quality rating are residences of higher quality built from individual or readily available designer plans in above-standard residential tract developments or on an individual property owner's site. The design includes significant exterior ornamentation and interiors that are well finished. The workmanship exceeds acceptable standards and many materials and finishes throughout the dwelling have been upgraded from "stock" standards.

#### Ω4

Dwellings with this quality rating meet or exceed the requirements of applicable building codes. Standard or modified standard building plans are utilized and the design includes adequate fenestration and some exterior ornamentation and interior refinements. Materials, workmanship, finish, and equipment are of stock or builder grade and may feature some upgrades.

#### Q5

Dwellings with this quality rating feature economy of construction and basic functionality as main considerations. Such dwellings feature a plain design using readily available or basic floor plans featuring minimal fenestration and basic finishes with minimal exterior ornamentation and limited interior detail. These dwellings meet minimum building codes and are constructed with inexpensive, stock materials with limited refinements and ungrades.

#### Q6

Dwellings with this quality rating are of basic quality and lower cost; some may not be suitable for year-round occupancy. Such dwellings are often built with simple plans or without plans, often utilizing the lowest quality building materials. Such dwellings are often built or expanded by persons who are professionally unskilled or possess only minimal construction skills. Electrical, plumbing, and other mechanical systems and equipment may be minimal or non-existent. Older dwellings may feature one or more substandard or non-conforming additions to the original structure

#### Definitions of Not Updated, Updated, and Remodeled

#### Not Updated

Little or no updating or modernization. This description includes, but is not limited to, new homes.

Residential properties of fifteen years of age or less often reflect an original condition with no updating, if no major components have been replaced or updated. Those over fifteen years of age are also considered not updated if the appliances, fixtures, and finishes are predominantly dated. An area that is 'Not Updated' may still be well maintained and fully functional, and this rating does not necessarily imply deferred maintenance or physical/functional deterioration.

#### Updated

The area of the home has been modified to meet current market expectations. These modifications are limited in terms of both scope and cost.

An updated area of the home should have an improved look and feel, or functional utility. Changes that constitute updates include refurbishment and/or replacing components to meet existing market expectations. Updates do not include significant alterations to the existing structure.

#### Remodeled

Significant finish and/or structural changes have been made that increase utility and appeal through complete replacement and/or expansion.

A remodeled area reflects fundamental changes that include multiple alterations. These alterations may include some or all of the following: replacement of a major component (cabinet(s), bathtub, or bathroom tile), relocation of plumbing/gas fixtures/appliances, significant structural alterations (relocating walls, and/or the addition of) square footage). This would include a complete gutting and rebuild.

#### **Explanation of Bathroom Count**

Three-quarter baths are counted as a full bath in all cases. Quarter baths (baths that feature only a toilet) are not included in the bathroom count. The number of full and half baths is reported by separating the two values using a period, where the full bath count is represented to the left of the period and the half bath count is represented to the right of the period.

#### Example:

3.2 indicates three full baths and two half baths.
